Reasons For Action And The Law:

Reasons for Action and the Law M.C. Redondo, 2013-06-29 A focus on reasons for action and practical reason is the perspective chosen by many contemporary legal philosophers for the analysis of some central questions of their discipline This book offers a critical evaluation of that approach by carefully examining the empirical logical and normative problems hidden behind the concepts of reason for action and practical reasoning Unlike most other works in this field it is a meta theoretical study which analyses and compares how different theories use the notion of reason in their reconstruction of problems concerning issues such as normativity the acceptance of norms or the justification of judicial decisions This book is directed primarily to scholars specializing in legal theory and concerned with the contribution practical philosophy can make to it but it also contains important arguments and insights for all those interested in the controversy between legal positivists and their critics in the theory of human action or in reason based practical theories in general

Aviation Law Cause of Action Exclusivity in the Warsaw and Montreal Conventions Cluxton, David, 2022-02-15 This incisive book tackles a controversy that has plagued the Warsaw Convention 1929 and the Montreal Convention 1999 for decades whether the conventions provide an independent

cause of action upon which a plaintiff can rely directly when pleading their action and if so whether that cause of action provides the exclusive remedy This book resolves this controversy by presenting a new conceptual framework for understanding aviation law cause of action in the conventions

The Normative Force of the Factual Nicoletta Bersier Ladavac, Christoph Bezemek, Frederick Schauer, 2019-06-26 This book explores the interrelation of facts and norms How does law originate in the first place What lies at the roots of this phenomenon How is it preserved And how does it come to an end Questions like these led Georg Jellinek to speak of the normative force of the factual in the early 20th century emphasizing the human tendency to infer rules from recurring events and to perceive a certain practice not only as a fact but as a norm a norm which not only allows us to distinguish regularity from irregularity but at the same time to treat deviances as transgressions Today Jellinek's concept still provides astonishing insights on the dichotomy of is and ought to be the emergence of the normative the efficacy and the defeasibility of legal norms and the distinct character of what legal theorists refer to as normativity It leads us back to early legal history it connects anthropology and legal theory and it demonstrates the interdependence of law and the social sciences In short it invites us to fundamentally reassess the interrelation of facts and norms from various perspectives The contributing authors
