Waterstone's Guide to Books Waterstone & Co, 1988 *International Books in Print*, 1990 Canadiana, 1988-07 **Industrial Policy Beyond the Crisis** David Bailey, Helena Lenihan, Josep-Maria Arauzo-Carod, 2014-06-11. After years of official disrepute industrial policy (IP) is back in vogue at regional, national and international levels, driven by concerns over competitiveness, globalisation, de-industrialisation, unemployment and the comparatively slow growth of the EU economy, especially in this post-recession phase. At the same time IP has been seen as a catalyst for designing economic recovery strategies at regional, national and international levels as well as being a concerted strategy to develop new clean tech industries to tackle environmental challenges. If anything, the recent global recession and credit crunch have highlighted the fragility of some states and localities' economic development paths and the unbalanced nature of their economies in terms of an over-reliance on sectors such as retail, financial services and construction to the detriment of manufacturing. This also suggests an accompanying need for greater economic diversity so as to avoid over-dependencies on certain sectors and a better balance of ownerships/forms. But what should be the shape of IP in the wake of the crisis and how can IP rebalance economies, help support sustainable development and catalyse new technologies and innovations whilst learning lessons from past experience and debate? This edited volume examines these questions through a wide range of diverse contributions from expert international authors. This book was originally published as a special issue of *Policy Studies* The New York Times Index, 1990.
