The Art of Experimental Economics Gary Charness, Mark Pingle, 2021-08-26 Applying experimental methods has become one of the most powerful and versatile ways to obtain economic insights and experimental economics has especially supported the development of behavioral economics. The Art of Experimental Economics identifies and reviews 20 of the most important papers to have been published in experimental economics in order to highlight the power and methods of this area and provides many examples of findings in behavioral economics that have extended knowledge in the economics discipline as a whole. Chosen through a combination of citations recommendations by scholars in the field and voting by members of leading societies the 20 papers under review some by Nobel prize winning economists run the full gamut of experimental economics from theoretical expositions to applications demonstrating experimental economics in action. Also written by a leading experimental economist each chapter provides a brief summary of the paper makes the case for why that paper is one of the top 20 in the field discusses the use made of the experimental method and considers related work to provide context for each paper. These reviews quickly expose readers to the breadth of application possibilities and the methodological issues leaving them with a firm understanding of the legacy of the papers contributions. This text provides a survey of some of the very best research in experimental and behavioral economics and is a valuable resource for scholars and economics instructors students seeking to develop capability in applying experimental methods and economics researchers who wish to further explore the experimental approach.

Experimental Economics Marie Claire Villeval, 2010 Although economics has long been considered as a non experimental science the development of experimental economics and behavioral economics is amazingly rapid and affects most fields of research. This paper first attempts at defining the main contributions of experiments to economics. It also identifies four main trends in the development of experimental research in economics. The third contribution of this paper is to identify the major theoretical and methodological challenges faced by behavioral and experimental economics.

Experimental Economics John D. Hey, 2013-06-29 It is to demonstrate the enormous potential of the experimental method in economics by providing examples of how experimental economics can shed important new light on key issues of vital economic significance. The subject matter covers several areas of economics and demonstrates why and how experimental methodology can provide new insight. It should prove invaluable to all economists but perhaps particularly those who are as yet unexposed to this particular methodology. The most active experimental economists contributed to this volume. Besides the editor of this volume there are to mention P Bohm P Burrows and G Loomes G W Harrison S S Lim E C Prescott and S Sunder A E Roth P Sbriglia.

Surveys in Experimental Economics Friedel Bolle, Marco Lehmann-Waffenschmidt, 2012-12-06 Experimental Economics has experienced a steadily growing interest by economists during the last decade. This may not surprise since laboratory and field experiments obviously provide a further valuable source of empirical evidence of economic behavior besides statistics econometrics polls interviews and simulations. In an overview of the recent developments in Experimental Economics the present book concentrates on three

central themes standing in the actual research focus bargaining cooperation and election markets For each one of these topics the volume presents several state of the art survey articles by experts in the field accompanied by detailed comments While the experimental approach sheds new light on the microeconomic standard topics of bargaining and cooperation the election market approach as a new field may provide better forecasts for political elections and for soccer World Championships Introduction to the Mini-Symposium on New Developments in Experimental Economics International Conference on New Developments in Experimental Economics. 1999, Ōsaka,2002
