Diagnosis and Treatment of Erectile Disturbances R. Taylor Segraves, 2012-12-06 This book is the result of an informal association between the editors which extends back to 1974 At the beginning it was a tenuous alliance between physicians in quite different medical subspecialties urology and psychiatry As the alliance was forged subspecialty rivalries and mistrust were replaced by a common clinical interest in the diagnosis and treatment of erectile problems We quickly became aware of the high prevalence of such disorders how poorly prepared we were to make accurate and responsible diagnosis and treatment plans and how complicated an etiological diagnosis could prove to be A variety of biological and psychological influences bear on sexual function and in many clinical contexts diagnosis and treatment planning involves consideration of complex interactive variables The need for an expanded multidisciplinary team became obvious The requisite knowledge base extended across too many subspecialty boundaries and the necessary information was not available in a convenient source As we began accumulating the information base we became aware that this information might be of value to other physicians The authors enjoy the luxury of an academic setting in which special expertise can be readily assembled Such resources are often unavailable to the physician in practice Thus it is our hope that this text can serve as a multi specialty team for the physician in solo practice R TAYLOR SEGRAVES New Orleans Louisiana HARRY W

Gynaecology for Post Graduates and Practitioners, 2/e Sengupta, 2007 The second edition of Gynaecology for Postgraduates and Practitioners presents and updates the many developments seen in gynaecological practice since the publication of the first edition Many additions and alterations have been deemed mandatory to keep up to date with the rapid changes in our knowledge within the various subspecialties of this fascinating specialty Appropriately many new sections have been added and many of the older sections are remodelled to accommodate the major changes in pathophysiology and management of gynaecological disorders About the Author Bijoy Sree Sengupta FRCSE FRCOG FACOG MFFP Consultant Obstetrician and Gynaecologist Retired North Durham University Hospital NHS Trust Durham UK Sisir K Chattopadhyay MD PhD Professor and Head Department of Obstetrics and Gynaecology College of Medical Sciences Bharatpur Chitwan Nepal Thankam R Varma MS PhD FRCS FRCOG Professor and Medical Director Institute of Reproductive Medicine Madras Medical Mission Chennai India

Disturbances in Male Fertility K. Bandhauer,G. Bartsch,J. Frick,D.M. de Kretser,A. Eshkol,M. Glezerman,J.B. Kerr,B. Lunenfeld,W. Pöldinger,H.P. Rohr,F. Scharfetter,P.D. Temple-Smith,2012-12-06 Impending famine and a terrifying rate of consumption of natural resources are vital issues which have focussed public interest in the ecologic social and political problems of ever increasing overpopulation in many countries of the world As well as the vast material and intellectual expenditure lavished on family planning and birth control the past decade has seen an immense research effort in the elaboration of improved methods of fertility control both for men and for women During the same period however research into the causes of male fertility disorders has proceeded with equal intensity and a number of promising therapeutic approaches have become the subject of clinical trials The wish of an individual or of a couple to have offspring is an absolute which requires no further justification and there can be few challenges to a physician as essential as the spouses predicament in a childless marriage Only with a special knowledge of the function pathology and pathophysiology of the reproductive system is he properly equipped to meet that challenge

Treatment of Male Infertility J. Bain,Wolf-Bernhard Schill,L. Schwarzstein,2012-12-06 Our insight into the mechanisms of the physiology of reproduction has experienced a swift and constant development these last few years The advent of more sophisticated diagnostic methods and their relatively easy clinical application allow for the incorporation of that knowledge into the evaluation of the infertile couple These facts together with an obvious change in social psychology have facilitated the development of different specialities dealing with the problems of infertility It is now possible in medical centers all around the world to undertake a better disposition of the infertile husband to look for advice to be studied and treated Confronted with this situation we are still unable to offer specific therapy in most cases however empirically based therapy abounds Advances in therapy have not kept pace with our increased physio logical knowledge and improved diagnostic techniques Patho physiological mechanisms and etiological factors in male infertility are largely unknown This has significantly hampered both clinical evaluation and advances in treatment allowing for frequent non scientific therapeutic incursions into the armamentarium of the an drologist Several factors have given birth to therapeutic fashions which are bound to survive as long as this state of lack of knowledge con tinues For example we may ask whether the treatment of varicocele constitutes a fashion Though we accept the

treatment of varicocele as the best available treatment of male infertility we do not know its mechanism of action and so we cannot predict a therapeutic result
