Recent Advances In Carbohydrate Bioengineering:

Recent Advances in Carbohydrate Bioengineering H. J. Gilbert, 1999 Presents 32 papers originating from the lectures given at the April 1999 meeting The papers examine the use of the catalytic structural and biological roles of carbohydrate modifying enzymes in the pharmaceutical food and agricultural industries Important topics discussed include a glycosidase catalyzed approach to oligosaccharide synthesis the biochemistry of the enzymes the solving of the three dimensional structures of glycoside hydrolases and transferases the field of non catalytic polysaccharide binding modules and the use of enzymes in the generation of industrially useful saccharides **Handbook of Food Enzymology** John R. Whitaker, Alphons G. J. Voragen, Dominic W.S. Wong, 2002-12-05 Discussing methods of enzyme purification characterization isolation and identification this book details the chemistry behavior and physicochemical properties of enzymes to control enhance or inhibit enzymatic activity for improved taste texture shelf life nutritional value and process tolerance of foods and food products The book covers **Advances in Enzyme Biotechnology** Pratyosh Shukla, Brett I. Pletschke, 2013-08-13 Enzyme Technology is one the most promising disciplines in modern biotechnology In this book the applications of a wide variety of enzymes are highlighted Current studies in enzyme technology are focused towards the discovery of novel enzymes termed bio discovery or bio prospecting and the identification and elucidation of novel pathways of these novel enzymes with emphasis on their industrial relevance With the development of molecular techniques and other bioinformatics tools the time to integrate this subject with other fields in the life sciences has arrived A rapid expansion of the knowledge base in the field of enzyme biotechnology has occurred over the past few years Much of this expansion has been driven by the bio discovery of many new enzymes from a wide range of environments some extreme in nature followed by subsequent protein enzyme engineering These enzymes have found a wide range of applications ranging from bioremediation bio monitoring biosensor development bioconversion to biofuels and other biotechnologically important value added products Hydrolases constitute a major component of the global annual revenue generated by industrial enzymes and the emphasis has therefore been placed on these enzymes and their applications With the immense interest of researchers active in this area this book will serve to provide information on current aspects in this field of study In the current edition the contributions of many diversified topics towards establishing new directions of research in the area of enzyme biotechnology are described This book serves to provide a unique source of information to undergraduates post graduates and doctoral courses in microbiology and biotechnology along with allied life sciences The present edition of the book covers all important areas of enzyme biotechnology i.e the wide variety of enzymes in the field of enzyme biotechnology and their industrial applications new methods and state of the art information on modern methods of enzyme discovery This book will act as good resource on most of the current facets of enzyme technology for all students engaged in bioengineering and biotechnology **Advances in Food Chemistry** O. P. Chauhan, 2022-10-05 The book compiles the latest advances in food chemistry It gives a detailed

account of the changes in food components during food processing and storage It analyses and describes different food components such as water protein fat carbohydrates minerals vitamins pigments flavors chemistry of plant tissues and animal tissues milk etc The book also discusses the effect of different food processing operations on the food components The book brings forth chapters authored by eminent researchers working in the area of Food Science and Technology The book is an up to date compilation of recent advances in food chemistry and is useful for students researchers and faculty as well as to industry experts in food sciences
