Anfara, Kathleen Roney, 2009-02-01 Sponsored by the Middle Level Education Research Special Interest Group and the National Middle School Association. Studies like the Third International Mathematics and Science Study (TIMSS) have compared the performance of U.S. middle grade students in eighth graders to those in other countries. In relation to middle grade schools, 20 countries outperformed the United States in mathematics, and nine countries scored above the U.S. in science. The intent of this volume of *The Handbook of Research in Middle Level Education: An International Look at Educating Young Adolescents* is to broaden our understanding of middle grade schooling by critically examining the education of young adolescents (ages 10-15, typically grades 6-8) through an international lens. In addition to looking at how schooling and students are organized for teaching and learning, this handbook will focus on the successes and failures that are evident in a wide variety of nations, present the indictments and praises that have been offered by supporters and critics alike, and review the research that has been generated about educating young adolescents in an effort to cross national boundaries. Ultimately, this volume of the handbook series will explore what
