Civic Hope Roderick P. Hart,2018-03-22 Civic Hope is a history of what everyday Americans say in their own words about the government overseeing their lives Based on a highly original analysis of 10 000 letters to the editor from 1948 to the present published in twelve US cities the book overcomes the limitations of survey data by revealing the reasons for people s attitudes While Hart identifies worrisome trends including a decline in writers abilities to explain what their opponents believe and their attachment to national touchstones he also shows why the nation still thrives Civic Hope makes a powerful case that the vitality of a democracy lies not in its strengths but in its weaknesses and in the willingness of its people to address those weaknesses without surcease The key Hart argues is to sustain a culture of argument at the grassroots level

Journalism Tim P. Vos, 2018-05-22 This volume sets out the state of the art in the discipline of journalism at a time in which the practice and profession of journalism is in serious flux. While journalism is still anchored to its history, change is infecting the field. The profession and the scholars who study it are reconceptualizing what journalism is in a time when journalists no longer monopolize the means for spreading the news. Here journalism is explored as a social practice, as an institution, and as memory. The roles, epistemologies, and ethics of the field are evolving. With this in mind, the volume revisits classic theories of journalism such as gatekeeping and agenda setting, but also opens up new avenues of theorizing by broadening the scope of inquiry into an expanded journalism ecology which now includes citizen journalism, documentaries, and lifestyle journalism, and by tapping the insights of other disciplines such as geography, economics, and psychology. The volume is a go-to map of the field for students and scholars, highlighting emerging issues, enduring themes, revitalized theories, and fresh conceptualizations of journalism.

Examining Newspapers Gerald C. Stone, 1987-06 Examining Newspapers reviews recent significant findings about newspapers and the newspaper industry. Arranged in chapters from news gathering through writing, editing, management, readership, and audience effects, this insightful volume focuses on continuing important themes in newspaper research. The author presents key studies and synthesizes their results to draw conclusions concerning what current research tells us about publishing, audience, relevant information, and about competing successfully for people's time and dollars. In addition, the volume is extensively referenced to lead readers back to the original research articles from which answers have been drawn.

Community Media in the Information Age Nick Jankowski, Ole Prehn, 2002 Small scale electronic media, local radio and television stations have experienced much turbulence and change in the 1990s. In western Europe, local and regional stations have achieved legitimation in national media policies; in central and eastern Europe, stations have been emerging at an explosive rate, and elsewhere in the world, developments have been no less substantial. These changes, taken as a whole, signal substantial, albeit diverse, forms of engagement and utilization of small scale electronic media. These developments have been recorded in only a handful of academic studies. No scholarly consideration of these media developments has appeared despite the range of development and widespread acknowledgement of their place in the media landscape. This volume is intended to fill this void through an integrated series of contributions emphasizing theoretical perspectives, empirical research findings, and developments regarding policy and practice. It reflects the state of scholarly work in this niche of the media landscape and charts areas for further investigations.
