Pop Architecture:

Pop Architecture, 1992 *Popular Architecture* Marshall William Fishwick, J. Meredith Neil, 1974 Twentieth-century Popular Culture in Museums and Libraries Fred E. H. Schroeder, 1981 Although libraries and museums for many centuries have taken the lead under one rational or another in recovering storing and displaying various kinds of culture of their periods lately as the gap between elite and popular culture has apparently widened these repositories of artifacts of the present for the future have tended to drift more and more to what many people call the aesthetically pleasing elements of our culture The degree to which our libraries and museums have ignored our culture is terrifying when one scans the documents and artifacts of our time which if history in any wise repeats itself will in the immediate and distant future become valuable indices of our present culture to future generations As Professor Schroeder dramatically states it No doubt about it it is the contemporary popular culture that is the endangered species The essays in this book investigate the reasons for present day neglect of popular culture materials and chart the various routes by which conscientious and insightful librarians and museum directors can correct this disastrous oversight *Architecture* Barie Fez-Barrington, 2011-11-15 The authors writings are based on his lecture series presented in 1968 at Yale University called *Architecture The Making of Metaphors* which was then published in part in *Main Currents in Modern Thought* then in many other journals including research into the works of Paul Weiss Andrew Ortony David Zarefsky and W J J Gordon *Las Vegas in the Rearview Mirror* Martino Stierli, 2013 An illustrated reevaluation of the seminal architectural manifesto *Learning from Las Vegas* It explores the significance of this controversial publication by situating it in the artistic architectural and urbanist discourse of the 1960s and 70s and by evaluating the book's enduring influence of visual studies and architectural research The Routledge Companion to Contemporary Architectural History Duanfang Lu, 2023-07-31 The Routledge Companion to Contemporary Architectural History offers a comprehensive and up to date knowledge report on recent developments in architectural production and research Divided into three parts Practices Interrogations and Innovations this book charts diversity criticality and creativity in architectural interventions to meet challenges and enact changes in different parts of the world through featured exemplars and fresh theoretical orientations The collection features 29 chapters written by leading architectural scholars and highlights the reciprocity between the historical and the contemporary research and practice and disciplinary and professional knowledge Providing an essential map for navigating the complex currents of contemporary architecture the Companion will interest students academics and practitioners who wish to bolster their understanding of built environments *Minoru Yamasaki* Dale Allen Gyure, 2017-11-28 The first book to reevaluate the evocative and polarizing work of one of midcentury America's most significant architects Born to Japanese immigrant parents in Seattle Minoru Yamasaki 1912 1986 became one of the towering figures of midcentury architecture even appearing on the cover of Time magazine in 1963 His self proclaimed humanist designs merged the modern materials and functional considerations of

postwar American architecture with traditional elements such as arches and colonnades Yamasaki's celebrated and iconic projects of the 1950s and 60s including the Lambert St Louis Airport and the U S Science Pavilion in Seattle garnered popular acclaim Despite this initial success Yamasaki's reputation began to decline in the 1970s with the mixed critical reception of the World Trade Center in New York one of the most publicized projects in the world at the time and the spectacular failure of St Louis's Pruitt Igoe Apartments which came to symbolize the flaws of midcentury urban renewal policy And as architecture moved in a more critical direction influenced by postmodern theory Yamasaki seemed increasingly old fashioned In the first book to examine Yamasaki's life and career Dale Allen Gyure draws on a wealth of previously unpublished archival material and nearly 200 images to contextualize his work against the framework of midcentury modernism and explore his initial successes his personal struggles including with racism and the tension his work ultimately found in the divide between popular and critical taste *Urban Residence* Christien Klaufus, 2012

An intellectual biography of the cultural critic Reyner Banham Reyner Banham 1922-88 was one of the most influential writers on architecture design and popular culture from the mid 1950s to the late 1980s Trained in mechanical engineering and art history he was convinced that technology was making society not only more exciting but more democratic His combination of academic rigor and pop culture sensibility put him in opposition to both traditionalists and orthodox Modernists but placed him in a unique position to understand the cultural social and political implications of the visual arts in the postwar period His first book *Theory and Design in the First Machine Age* still in print with The MIT Press after forty years was central to the overhaul of Modernism and it gave Futurism and Expressionism credibility amid the dynamism and change of the 1960s This intellectual biography is the first comprehensive critical examination of Banham's theories and ideas not only on architecture but also on the wide variety of subjects that interested him It covers the full range of his oeuvre and discusses the values enthusiasms and influences that formed his thinking **Pop Architecture**, 1998 The Monument Kanan

Makiya,2003-12-31 In Baghdad an enormous monument nearly twice the size of the Arc de Triomphe towers over the city Two huge forearms emerge from the ground clutching two swords that clash overhead Those arms are enlarged casts of those of Saddam Hussein showing every bump and follicle The Victory Arch celebrates a victory over Iran in their eight year long war that never happened This text is a study of the interplay between art and politics of how culture normally an unquestioned good can play into the hands of a power with devastating effects Kanan Makiya uses the culture invented by Saddam Hussein as a window into the nature of totalitarianism and shows how art can become the weapon of dictatorship Under Saddam Hussein culture connived in his evil this text explains how It should be useful reading for anyone concerned with the power of culture and the culture of power

Architect Knows Best Simon Richards,2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius Le Corbusier and Jos Luis Sert in the first half of the 20th century Their proposals for functional zoning multi level transport high rise living and machine inspired aesthetics

came under attack from the 1950s onwards and many alternative approaches to architecture and planning emerged. It was thought that the environmental determinist strand of the discourse was killed off at this time as well. This book argues that it was not but on the contrary that it has deepened and diversified. Many of the most prominent architect planners continue to design with a view to improving the behaviour of individual people and of society at large. By looking at and interviewing major figures and movements of recent years in Britain, Europe and America including Le Corbusier, Peter Eisenman, Andres Duany, Jane Jacobs, Robert Venturi and Denise Scott Brown, it demonstrates the myriad ways that architect planners seek to shape human behaviour through buildings. In doing so, the book raises awareness of this strand within the discourse and examines its different purposes and manifestations. It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase, discusses why it is seldom acknowledged directly, and whether it could be handled more responsibly and with greater understanding. Richards does not provide any simple solutions but in conclusion is critical of architect planners who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings.

Fast Food, Stock Cars, and Rock 'n' Roll George O. Carney, 1995
The only anthology of its kind, this collection brings together classic and recent essays by thirteen leading geographers exploring American popular culture. The essays examine music, food, sports, politics, architecture, clothing, and religion within the context of five themes of cultural geography: region, diffusions, ecology, integration, and landscape. A list of suggested readings follows each section. **Fast Food, Stock Cars, and Rock n Roll** is an excellent text for introductory courses appealing to students through its discussion of such topics as grunge, rock, fast food, and blue jeans.

Capsules: Typology of Other Architecture Peter Šenk, 2017-10-12
This book investigates the architectural product design and urban typology of the capsule, which beginning in the 1960s broadened the concept of the basic building blocks of architecture to include a minimal living unit called the capsule. Here it is presented with regard to the continuity of the development of the Modern Movement, its revisionist criticism, pioneering examples as well as contemporary examples, and uses the typology of the capsule to allow us to consider this theme in terms of the architecture of resistance with the potential to search for an other architecture that is embedded in our contemporaneity, manifested in small dwellings, composite structures, and container units, shelters, and mobile homes in nature and the urban environment, technology transfer in high tech designs, devices, additions, and extensions, etc. The concept of the capsule as a building element of architecture as well as a spatial element can therefore be regarded as having a generative potential for an architecture of personal space for the individual, forcing us to reflect on our existing living and dwelling conditions.
