An Anthropological lifetime in Japan Joy Hendry, 2016-12-05 Joy Hendry's collection demonstrates the value of an anthropological approach to understanding a particular society by taking the reader through her own discovery of the field, explaining her practice of it in Oxford and Japan, and then offering a selection of the results and findings she obtained. Her work starts with a study of marriage made in a small rural community, continues with education and the rearing of children, and later turns to consider polite language, especially amongst women. This leads into a study of wrapping and cultural display, for example of gardens and theme parks, which became a comparative venture putting Japan in a global context. Finally, the book sums up change through the period of Hendry's research.

Playing Ourselves Laura Peers, 2007-03-15 Across North America, hundreds of reconstructed living history sites, which traditionally presented history from a primarily European perspective, have hired Native staff in an attempt to communicate a broader view of the past. *Playing Ourselves* explores this major shift in representation using detailed observations of five historic sites in the U.S. and Canada to both discuss the theoretical aspects of Native cultural performance and advise interpreters and their managers on how to more effectively present an inclusive history. Drawing on anthropology, history, cultural performance, cross-cultural encounters, material culture theory, and public history, author Laura Peers examines living history sites as locations of cultural performance where core beliefs about society, cross-cultural relationships, and history are performed. In the process, she emphasizes how choices made in the communication of history can both challenge these core beliefs about the past and improve cross-cultural relations in the present.

Essential Economics for Heritage Peter G. Gould, 2025-10-16 *Essential Economics for Heritage* introduces tools from economics to help students and heritage professionals who face economic issues and choices in their day-to-day work in archaeology, museum, and site management, and heritage research, presentation, and conservation. The book begins with an easy-to-follow primer linking heritage and economic theory. Case studies and non-technical explanations of theoretical issues follow along with useful analytical approaches and practical insights that will support readers as they make decisions on allocating scarce financial, physical, and human resources. Peter G. Gould critically evaluates the role of heritage in the world economy and the tools economists have created to value heritage resources. He applies economic concepts and methods to real-world challenges including heritage tourism, the role of heritage in economic development, heritage sustainability, investment decision making, and financing for heritage organizations. He explores emerging directions in the often contentious relationships among international agencies, national governments, the private sector, and communities in the management of heritage. The book's scope is global. It draws on examples from wealthy countries in the Global North and

from low to middle income countries that often depend on heritage resources to fuel tourist economies Essential Economics for Heritage is an invaluable resource for heritage practitioners and can serve as a textbook or auxiliary text for courses in archaeology heritage site or museum management conservation and other heritage fields **Artifak** Hugo
