concern about the negative implications of climate change for the enjoyment of human rights and the Paris Agreement is the first multilateral climate agreement to refer explicitly to states human rights obligations in connection with climate change. Yet despite this there are still significant gaps in our understanding of the role of international human rights law in enhancing accountability for climate action or inaction. As the Paris Agreement has shifted the focus of the climate change regime towards voluntary action and the humanitarian impacts of climate change are increasingly being felt around the world, accountability for climate change has become an increasingly salient issue. This book offers a timely and comprehensive analysis of the legal issues related to accountability for the human rights impact of climate change, drawing on the state responsibility regime. It explains when and where state action relating to climate change may amount to a violation of human rights and evaluates various avenues of legal redress available to victims. The overall analysis offers a perceptive insight into the potential of innovative rights based climate actions to shape climate and energy policies around the world.

Corporate Social Responsibility, Human Rights and the Law Stéphanie Bijlmakers, 2018-07-26. Corporate Social Responsibility, Human Rights and the Law examines the responsibilities of business enterprises for human rights from a legal perspective. It analyses the legal status of the corporate responsibility to respect human rights as articulated by the United Nations Guiding Principles on Business and Human Rights (UNGPs). This concept currently reflects an international consensus and is promoted by the UN. The book contemplates the various founding perspectives of the UNGPs and how the integration of notions such as principled pragmatism and polycentric governance within its framework provides insights into the future course of law and policy compliance and corporate respect for human rights. The book thus takes a global focus, examining the interaction of Corporate Social Responsibility (CSR), human rights and the law in a broader global governance context. Setting out a possible future scenario for the legalization of the corporate responsibility to respect human rights that is informed by the UNGPs' founding perspectives and reflects current realities in the human rights landscape, this book will be of great interest to scholars of business ethics, international human rights law and CSR more broadly.

Routledge Handbook of Human Rights and Climate Governance Sébastien Duyck, Sébastien Jodoin, Alyssa Johl, 2018-02-15. Over the last decade the world has increasingly grappled with the complex linkages emerging between efforts to combat climate change and to protect human rights around the world. The Paris Climate Agreement adopted in December 2015 recognized the necessity for governments to take into consideration their human rights obligations when taking climate action. However, important gaps remain in understanding how human rights can be used in practice to develop and implement effective and equitable solutions to climate change at multiple levels of governance. This book brings together leading scholars and practitioners to offer a timely and comprehensive analysis of the opportunities and challenges for integrating human rights in diverse areas and forms of global climate governance. The first half of the book explores how human rights principles and obligations can be used to reconceive climate governance and shape responses to particular aspects of climate change. The

second half of the book identifies lessons in the integration of human rights in climate advocacy and governance and sets out future directions in this burgeoning domain Featuring a diverse range of contributors and case studies this Handbook will be an essential resource for students scholars practitioners and policy makers with an interest in climate law and governance human rights and international environmental law
