

Race

- is NOT based on biology; CREATED category with historical roots used to classify groups of people.
- historically was not determined by skin color but by class inequalities (e.I., the English defined the Irish as a "lower" race.)
- during colonial expansion by European nations, race was defined in terms of skin color where non-white people were considered "lower" races.
- Today, relationships between differently raced people are still determined by this moment in history and remain unequal, where white people have the most power and privilege and are considered the norm (ie. non-raced.)•
- is important to understand that white is also a created racial category.•
- is also important to understand that though racial categories derived from oppressive contexts, they can also be reclaimed and used as forms of resistance by communities of color.
