Reconciling Yogas:

Reconciling Yogas Christopher Key Chapple, 2012-02-01 Reconciling Yogas explores five approaches to the accomplishment of Yoga from a variety of religious perspectives Jain, Hindu and Buddhist. Haribhadra, a prolific Jain scholar who espoused a universal view of religion, proclaimed that truth can be found in all faiths and sought to elucidate differences between various schools of thought. In Yoga, he discovered a form of spiritual practice common to many faiths and juxtaposed their paths to demonstrate the common goal of liberation. Utilizing the structure of Patajali's advanced eightfold path of Yoga in the Yoga Sutra, Haribhadra formulates his own eight stages of Yoga to which he assigns titles in the feminine gender that echo the names of goddesses. Discussed are the Jain stages of spiritual ascent and two forms of Yoga for which there is no other account. Also included is a new translation of the Yogad isamuccaya, an eighth century text by Haribhadra.

Reconciling Yogas Christopher Key Chapple, 2003-11-06 Presents the various religious approaches to Yoga described by Haribhadra, the eighth century sage who held a universal view of religion. Includes a translation of his original text on Yoga.

Tracing the Path of Yoga Stuart Ray Sarbacker, 2021-01-01 Clear, accessible and meticulously annotated. Tracing the Path of Yoga offers a comprehensive survey of the history and philosophy of yoga that will be invaluable to both specialists and to nonspecialists seeking a deeper understanding of this fascinating subject. Stuart Ray Sarbacker argues that yoga can be understood first and foremost as a discipline of mind and body that is represented in its narrative and philosophical literature as resulting in both numinous and cessative accomplishments that correspond respectively to the attainment of this worldly power and otherworldly liberation. Sarbacker demonstrates how the yogic quest for perfection as such is situated within the concrete realities of human life intersecting with issues of politics, economics, class, gender and sexuality as well as reflecting larger Indic religious and philosophical ideals.

Thinking with the Yoga Sutra of Patañjali Ana Laura Funes Maderey, Christopher Key Chapple, 2019-05-20 This book presents contemporary scholarship on the Yoga Sutra. It revisits Patajali's philosophy by bringing it into dialogue with contemporary concerns across a variety of topics and perspectives. Questions regarding the role of the body in the practice of classical yoga, the debate between the realistic or idealistic interpretation of the text, the relation between Yoga and other Indian philosophical schools, the use of imagination in the pursuit of self-knowledge, the interplay between consciousness and nature, the possibilities and limitations of using it as a therapeutic philosophy, the science of meditation and overcoming our fear of death, probe the many dimensions that this text continues to offer for thought and reflection.

Asian Traditions of Meditation Halvor Eifring, 2018-01-31 Meditation has flourished in different parts of the world ever since the foundations of the great civilizations were laid It played a vital role in the formation of Asian cultures that trace much of their heritage to ancient India and China This volume brings together for the first time studies of the major traditions of Asian meditation as well as material on scientific approaches to meditation It delves deeply into the individual traditions while viewing each of them from a global perspective examining both historical and generic connections between meditative practices from numerous historical periods and different parts of the Eurasian continent It seeks to identify the cultural and historical peculiarities of Asian schools of meditation while recognizing basic features of meditative practice across cultures thereby taking the first step toward a framework for the comparative study of meditation The book accessibly written by scholars from several fields opens with chapters that discuss the definition and classification of meditation These are followed by contributions on Yoga and Tantra which are often

subsumed under the broad label of Hinduism Jainism and Sikhism Indian traditions not usually associated with meditation Buddhist approaches found in Southeast Asia Tibet and China and the indigenous Chinese traditions Daoism and Neo Confucianism The final chapter explores recent scientific interest in meditation which despite its Western orientation remains almost exclusively concerned with practices of Asian origin Until a few years ago a major obstacle to the study of specific meditation practices within the traditions explored here was a widespread scholarly orientation that prioritized doctrinal issues and sociocultural contexts over actual practice The contributors seek to counter this bias and supplement concerns over doctrine and context with the historical study of meditative practice Asian Traditions of Meditation will appeal broadly to readers interested in meditation mindfulness and spirituality and those in the emerging field of contemplative education as well as students and scholars of Asian and religious studies
