Thomas A. Dutton, Lian Hurst Mann

Reconstructing Architecture:

Reconstructing Architecture for the Twenty-first Century Anthony Jackson, 1995-01-01 Jackson exposes the inadequacies of old conceptions of architecture as embodying metaphysical properties and of architects as the sole keepers of this esoteric knowledge He challenges architects to acknowledge and celebrate building as an expression of the ideals and values of the broader based classless communities to which they now belong *Reconstructing Architecture* Thomas A. Dutton, Lian Hurst Mann, **Reconstructing Architecture** Thomas A. Dutton, Lian Hurst Mann, 1996 Reconstructing Architecture was first published in 1996 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions To create architecture is an inherently political act yet its nature as a social practice is often obscured beneath layers of wealth and privilege The contributors to this volume question architecture's complicity with the status quo moving beyond critique to outline the part architects are playing in building radical social movements and challenging dominant forms of power The making of architecture is instrumental in the construction of our identities our differences the world around us much of what we know of institutions the distribution of power social relations and cultural values is mediated by the built environment Historically architecture has constructed the environments that house the dominant culture Yet as the essays in Reconstructing Architecture demonstrate there exists a strong tradition of critical practice in the field one that attempts to alter existing social power relations Engaging the gap between modernism and postmodernism each chapter addresses an oppositional discourse that has developed within the field and then reconstructs it in terms of a new social project feminism social theory environmentalism cultural studies race and ethnic studies and critical theory The activists and scholars writing here provide a clarion call to architects and other producers of culture challenging them to renegotiate their political allegiances and to help reconstruct a viable democratic life in the face of inexorable forces driving economic growth destroying global ecology homogenizing culture and privatizing the public realm Reconstructing Architecture reformulates the role of architecture in society as well as its capacity to further a progressive social transformation Contributors Sherry Ahrentzen U of Wisconsin Milwaukee Bradford C Grant California Polytechnic State U San Luis Obispo Richard Ingersoll Rice U Margaret Soltan George Washington U Anthony Ward U of Auckland New Zealand Thomas A Dutton is an architect and professor of architecture at Miami University Ohio He is editor of *Voices in Architectural Education* 1991 and is associate editor of the *Journal of Architectural Education* Lian Hurst Mann is an architect and editor of *Architecture California* A founding member of the Labor Community Strategy Center in Los Angeles she is editor of its bilingual quarterly *Ahora Now* and a coauthor of *Reconstructing Los Angeles from the Bottom Up* 1993 *Reconstructing Architecture for the Twenty-first Century* Anthony Jackson, 1995 *Software Technologies* Hans-Georg Fill, Francisco José Domínguez Mayo, Marten van Sinderen, Leszek A. Conference on Software Technologies ICSOFT 2023 held in Rome Italy during July 10 12 2023 The 7 full papers included in this book were carefully reviewed and selected from 129 submissions They focus on Software Engineering and Systems Development Software Systems and Applications and Foundational and Trigger Technologies Queering Architecture Marko Jobst, Naomi Stead, 2023-01-26 Featuring contributions from a range of significant voices in the field this volume renews the conversation around what it means to speak of the queer in the context of architecture and offers a fresh take on the methodological and epistemological challenges this poses to the discipline of architectural theory Architecture as a discipline a profession and an applied practice is always subordinate to its own conceptual framework which is one of orderliness It refers to buildings but also to infrastructures of thought and knowledge to conventions and taxonomies to structures of governance hierarchies of power and systems of administration How then can one look at queering architectural discourse when the very term queer celebrated for its elusive nature resists and attacks such order Divided into four subsections the essays in this anthology each pursue a distinct line of inquiry methods practices spaces and pedagogies in order to help particularize the proposed queering of architecture They demonstrate the paradoxical nature of the endeavour from a diverse range of perspectives from questions of mapping queer theory in architecture to issues of queer architectural archives or lack thereof to non Western challenges to the very term queer and the queering of basic assumptions across affiliated disciplines *Queering Architecture* not only provides a bold challenge to the normative methods employed in architectural discourse but also addresses how establishing queer methodologies is a paradox in itself

to reveal unexpected tactics for enlarging possibilities Grounded in architecture histories and theories philosophy and anarchism s emphasis on use and dissensus combined with PUNK s DIY ethos design studio emphasis on technicity is upended to reveal the subversive aim of intensifying tensions between doomed desires for artistic autonomy and intrinsic burdens of use constituting architecture as a discipline instead of seeking resolution some neutral middle ground or escape into banal practice or paper palaces By concentrating on what architecture education suppresses tensions disavows its capture within the building industry or affirms commercial practice over disciplinary knowledge *Recoding Architecture Pedagogy Insurgency and Invention* cracks open horizons of possibility by showing how intensifying agonistic relationships between the myriad binaries that characterize architecture and its teaching is generative in ways conciliatory synthesis cathartic resolution and uncritical affirmation are not

Women, Practice, Architecture Naomi Stead, 2016-01-08 The image of the architect is undeniably gendered While the male architect might be celebrated as the ideal man in Hollywood romantic comedies blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle the image of the woman architect is not so clear cut While women have been practicing and excelling in architecture for more than a hundred years their professional identity as constructed in the media is complex and sometimes contradictory This book explores the working lives and aspirations of women in architectural practice but more than this it explores how popular media newspapers magazines and websites serve to define and describe who a woman architect should be what she should look like and how she should behave Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine but instead a complex hybrid owing much to historic concepts of genius Drawing on history sociology media analysis and feminist theories of architectural practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of *Architectural Theory Review*
