Recultivating The Vineyard:

Recultivating the Vineyard Scott H. Hendrix, 2004-01-01 Scott Hendrix argues in this book that the sixteenth century reformers all shared the same goal to Christianize Christendom that is to replant authentic Christianity in the vineyard of the Lord in the same European Christendom which they believed had been devastated by the medieval church He believes it is more accurate and useful to speak of one Reformation and to locate its diversity in the various theological and practical agendas that were developed to realize the goal of Christianization *Edwards, Germany, and Transatlantic Contexts* Rhys Bezzant, 2021-12-06 Jonathan Edwards engaged in notable ways with the church in Germany through his writings on spirituality theology and missiology but this contribution has rarely been acknowledged in academic publications In this book scholars who have an interest in both Edwards and the church in Europe offer contributions to a significant worldwide conversation on Edwards s texts and teachings He found an ally in Martin Luther sought out encouragement from German Pietists and engaged with Western traditions of philosophy which proved useful in sharpening subsequent reflection on God s work in the world Edwards was not just a remote colonial American pastor but an active participant in the transatlantic republic of letters and contributed to the birth of the global missions movement for which the church in Germany was itself a significant base *Enemies of the Cross* Vincent Everer, 2021-01-05 *Enemies of the Cross* examines how suffering and truth were aligned in the divisive debates of the early Reformation Vincent Everer draws on seldom used sources and describes how Protestants and radicals brought medieval mystical teachings into new frameworks that rejected spiritual hierarchy

Faith in War Nikolas M. Funke, 2024-08-01 While the social and cultural history of the early modern military has greatly advanced in the last few decades the religious dimension of the military life in the Holy Roman Empire between 1500 and 1650 has hardly been explored The Reformation brought profound political social and cultural upheavals but the religiosity of the men and women who followed the Christian life in the chaos of war still represents a large gap in the historiography *Faith in War* shows that confessional antagonisms lost much of their meaning during war and coexistence became a fact of army life Connecting military and civilian social and cultural history in these ways Nikolas Funke s case study on this period brings new life to important current historiographical discussions in a military context including stereotyping

confessionalization social discipline deviance toleration religious violence and the culture of death **The European Reformation** Euan Cameron, 2012-03-01 Since its first appearance in 1991 *The European Reformation* has offered a clear integrated and coherent analysis and explanation of how Christianity in Western and Central Europe from Iceland to Hungary from the Baltic to the Pyrenees splintered into separate Protestant and Catholic identities and movements Catholic Christianity at the end of the Middle Ages was not at all a uniformly decadent or corrupt institution it showed clear signs of cultural vigour and inventiveness However it was vulnerable to a particular kind of criticism if ever its claims to mediate the grace of God to believers were challenged Martin Luther proposed a radically new insight into how God forgives human sin

In this new theological vision rituals did not purify people priests did not need to be set apart from the ordinary community the church needed no longer to be an international body For a critical Reformation moment this idea caught fire in the spiritual political and community life of much of Europe Lay people seized hold of the instruments of spiritual authority and transformed religion into something simpler more local more rooted in their own community So were born the many cultures liturgies musical traditions and prayer lives of the countries of Protestant Europe This new edition embraces and responds to developments in scholarship over the past twenty years Substantially re written and updated with both a thorough revision of the text and fully updated references and bibliography it nevertheless preserves the distinctive features of the original including its clearly thought out integration of theological ideas and political cultures helping to bridge the gap between theological and social history and the use of helpful charts and tables that made the original so easy to use **King**

Sigismund of Poland and Martin Luther Natalia Nowakowska, 2018 The first major study of the early Reformation and the Polish monarchy for over a century this volume asks why Crown and church in the reign of King Sigismund I 1506 1548 did not persecute Lutherans It offers a new narrative of Luther s dramatic impact on this monarchy which saw violent urban Reformations and the creation of Christendom s first Lutheran principality by 1525 placing these events in their comparative European context King Sigismund s realm appears to offer a major example of sixteenth century religious toleration the king tacitly allowed his Hanseatic ports to enact local Reformations enjoyed excellent relations with his Lutheran vassal duke in Prussia allied with pro Luther princes across Europe and declined to enforce his own heresy edicts Polish church courts allowed dozens of suspected Lutherans to walk free Examining these episodes in turn this study does not treat toleration purely as the product of political calculation or pragmatism Instead through close analysis of language it reconstructs the underlying cultural beliefs about religion and church ecclesiology held by the king bishops courtiers literati and clergy asking what at heart did these elites understand Lutheranism and catholicism to be It argues that the ruling elites of the Polish monarchy did not persecute Lutheranism because they did not perceive it as a dangerous Other but as a variant form of catholic Christianity within an already variegated late medieval church where social unity was much more important than doctrinal differences between Christians Building on John Bossy and borrowing from J G A Pocock it proposes a broader hypothesis on the Reformation as a shift in the languages and concept of orthodoxy *Reformation of Prayerbooks* Chaoluan Kao, 2017-11-13 In her study Chaoluan Kao offers a comprehensive investigation of popular piety at the time of the European Reformations through the study of sixteenth and seventeenth century Protestant prayerbooks It pursues a historical contextual approach to spirituality by integrating social and religious history in order to yield a deeper understanding of both the history of Christian piety and of church history in general The study explores seven prayerbooks by German authors and seventeen English prayerbooks from the Reformation and post Reformation as well as from Lutheran Anglican and Puritan traditions examining them as spiritual texts with social and theological significance that helped disseminate popular

understandings of Protestant piety Early Protestant piety required intellectual engagement emphasized a faithful and heartfelt attitude in approaching God and urged regular exercise in prayer and reading Early Protestant prayerbooks modeled for their readers a Protestant piety that was a fervent spiritual practice solidly grounded in the social context and connections of its practitioners Through those books Reformation could be understood as redefining the meanings of people's spiritual lives and re-discovering of a pious life In a broader sense they functioned as a channel of historical and spiritual transition which not only tells us the transformation and transmission of Reformation historically but also signifies the development of Christian spirituality The social historical study of the prayerbooks furthers our understanding of continuity change and inter-confessional influence in the Christian piety of early modern Europe

Christianization and Commonwealth in Early Medieval Europe Nathan J. Ristuccia, 2018 Christianization and Commonwealth in Early Medieval Europe re-examines the alterations in Western European life that followed widespread conversion to Christianity the phenomena traditionally termed Christianization It refocuses scholarly paradigms for Christianization around the development of mandatory rituals One prominent ritual Rogationtide supplies an ideal case study demonstrating a new paradigm of Christianization without religion Christianization in the Middle Ages was not a slow process through which a Christian system of religious beliefs and practices replaced an earlier pagan system In the Middle Ages religion did not exist in the sense of a fixed system of belief bounded off from other spheres of life Rather Christianization was primarily ritual performance Being a Christian meant joining a local church community After the fall of Rome mandatory rituals such as Rogationtide arose to separate a Christian commonwealth from the pagans heretics and Jews outside it A Latin West between the polis and the parish had its own institution the Rogation procession for organizing local communities For medieval people sectarian borders were often flexible and rituals served to demarcate these borders Rogationtide is an ideal case study of this demarcation because it was an emotionally powerful feast which combined pageantry with doctrinal instruction community formation social ranking devotional exercises and bodily mortification As a result rival groups quarrelled over the holiday's meaning and procedure sometimes violently in order to reshape the local order and ban people and practices as non-Christian

The Puritans David D. Hall, 2021-04-06 Shedding critical new light on the diverse forms of Puritan belief and practice in England Scotland and New England Hall provides a multifaceted account of a cultural movement that judged the Protestant reforms of Elizabeth's reign to be unfinished Provided by publisher

The Oxford Handbook of Martin Luther's Theology Robert Kolb, Irene Dingel, Lubomír Batka, 2014-04-24 As celebrations of the five hundredth anniversary of Martin Luther's initiation of the most dramatic reform movement in the history of Christianity approach 47 essays by historians and theologians from 15 countries provide insight into the background and context the content and the impact of his way of thought Nineteenth century Chinese educational reformers twentieth century African and Indian social reformers German philosophers and Christians of many traditions on every continent have found in Luther's writings stimulation and

provocation for addressing modern problems This volume offers studies of the late medieval intellectual milieu in which his thought was formed the hermeneutical principles that guided his reading and application of the Bible the content of his formulations of Christian teaching on specific topics his social and ethic thought the ways in which his contemporaries both supporters and opponents helped shape his ideas the role of specific genre in developing his positions on issues of the day and the influences he has exercised in the past and continues to exercise today in various parts of the world and the Christian church Authors synthesize the scholarly debates and analysis of Luther's thinking and point to future areas of research and exploration of his thought
