Neopoetics Christopher Collins, 2016-11-29 The quest to understand the evolution of the literary mind has become a fertile field of inquiry and speculation for scholars across literary studies and cognitive science In Paleopoetics Christopher Collins's acclaimed earlier title he described how language emerged both as a communicative tool and as a means of fashioning other communicative tools stories songs and rituals In Neopoetics Collins turns his attention to the cognitive evolution of the writing ready brain Further integrating neuroscience into the popular field of cognitive poetics he adds empirical depth to our study of literary texts and verbal imagination and offers a whole new way to look at reading writing and creative expression Collins begins Neopoetics with the early use of visual signs first as reminders of narrative episodes and then as conventional symbols representing actual speech sounds Next he examines the implications of written texts for the play of the auditory and visual imagination To exemplify this long transition from oral to literate artistry Collins examines a wide array of classical texts from Homer and Hesiod to Plato and Aristotle and from the lyric innovations of Augustan Rome to the inner dialogues of St Augustine In this work of big history Collins demonstrates how biological and cultural evolution collaborated to shape both literature and the brain we use to read it

Shaping a Monastic Identity

Susan Boynton, 2006 During the eleventh and early twelfth centuries the imperial abbey of Farfa was one of the most powerful institutions on the Italian peninsula In this period

many of the lands of central Italy fell under its sway and it enjoyed the protection of the emperor until the 1120s when it passed gradually into the control of the papacy At the same time the monastery was an influential religious center and the monks of Farfa filled their days with the celebration of the liturgy through prayers processions sermons chants and hymns Susan Boynton a historian of medieval music addresses several of the major themes of present day medieval historiography through a close study of the liturgical practices of the abbey of Farfa Boynton s findings are a striking demonstration of the local nature of liturgical practices in the centuries before church ritual was controlled and codified by the papacy Boynton shows that the liturgy was highly flexible continually adapting to the monastery s changing circumstances The monks regularly modified traditional forms to reflect new realities often in the service of Farfa s power and prestige Equally fascinating is Boynton s examination of the process by which Farfa like other monasteries cathedral chapters and royal houses constantly rewrote its history particularly the stories of its founding as part of the continuous negotiation of power that was central to medieval politics and culture
