Recycling And Incineration Evaluating The Choices:

Recycling and Incineration Richard Denison, John Ruston, Environmental Defense Fund, 1990-09-01 Recycling and Incineration presents information on the technology economics environmental concerns and legal intricacies behind recycling and incineration programs The Economics of Residential Solid Waste Management Thomas C. Kinnaman, 2017-10-24 The market of municipal solid waste MSW collection and disposal has changed substantially over the past thirty years This study will help guide both newcomers and past contributors through the fundamental aspects of policies designed to reduce the external costs of MSW collection and the important empirical relationships that in the end govern the selection of MSW policies The International Library of Environmental Economics and Policy explores the influence of economics on the development of environmental and natural resource policy In a series of twenty five volumes the most significant journal essays in key areas of contemporary environmental and resource policy are collected Scholars who are recognized for their expertise and contribution to the literature in the various research areas serve as volume editors and write essays that provides the context for the collection Volumes in the series reflect three broad strands of economic research including 1 Natural and Environmental Resources 2 Policy Instruments and Institutions and 3 Methodology The editors in their introduction to each volume provide a state of the art overview of the topic and explain the influence and relevance of the collected papers on the development of policy This reference series provides access to the economic literature that has shaped contemporary perspectives on land use analysis and policy **General Technical Report RM.**, 1994 **Green Technology and Design for the Environment** Samir Billatos, 2024-11-01 This book is intended to be an introductory reference to green technology and design for the environment GTDFE for working professionals as well as a basic text for graduate course work in engineering covering all facets of GTDFE **Resource Conservation and Recovery Act Amendments of 1991** United States. Congress. Senate. Committee on Environment and Public Works. Subcommittee on Environmental Protection, 1991 **The Economics of Waste** Richard C. Porter, 2010-09-30 In this concise engaging and provocative work Richard Porter introduces readers to the economic tools that can be applied to problems involved in handling a diverse range of waste products from business and households Emphasizing the impossibility of achieving a zero risk environment Porter focuses on the choices that apply in real world decisions about waste Acknowledging that effective waste policy integrates knowledge from several disciplines Porter focuses on the use of economic analysis to reveal the costs of different policies and therefore how much can be done to meet goals to protect human health and the environment With abundant examples he considers subjects such as landfills incineration and illegal disposal He discusses the international trade in waste the costs and benefits of recycling and special topics such as hazardous materials Superfund and nuclear waste While making clear his belief that not every form of waste presents the same amount of risk Porter stresses the need for open minded approaches to developing new policies For students policymakers and general readers he provides insight

and accessibility to a subject that others might leave out of sight out of mind or buried under an impenetrable prose of statistics and jargon **Resource Conservation and Recovery Act Amendments of 1991: July 31; September 11, 12, 13, and 17, 1991** United States.
