University of Melbourne Universitas Indonesia and Universitas Gadjah Mada The volume opens with a macroscopic perspective outlining the broader economic situations confronting Indonesia and Australia before adopting a more microscopic perspective to closely examine the issues surrounding major infrastructure investment in both countries Detailed case studies are provided key challenges are identified and evidence based solutions are offered These solutions respond to such topical issues as how to overcome delays in infrastructure project initiation how to enhance project decision making for the selection and evaluation of projects how to improve overall efficiency in the arrangement of project finance and governance and how to increase the return provided by investment in infrastructure Special focus is given to proposed improvements to the port cities of Indonesia in the areas of major infrastructure project governance policies engagement operation and processes By rigorously investigating the economic transport finance and policy aspects of infrastructure investment this book will be a valuable resource for policy makers and government officials in Indonesia and Australia infrastructure investment organisations and companies involved in exporting services between Indonesia and Australia This book will also be of interest to researchers and students of infrastructure planning and financing setting a solid foundation for subsequent investigations of financing options for large scale infrastructure developments
