Natural Capitalism Paul Hawken, Amory B. Lovins, L. Hunter Lovins, 2013-09-13 On its first publication 10 years ago Natural Capitalism rocked the world of business with its innovative new approach an approach that fused ecological integrity

with business acumen using the radical concept of natural capitalism This 10th anniversary edition features a new Introduction by Amory B Lovins and Paul Hawken which updates the story to include the successes of the last decade It clearly sets out the path that we must now take to ensure the future prosperity of our civilisation and our planet

Materials Matter Ken Geiser, 2001-05-25 The products we purchase and use are assembled from a wide range of naturally occurring and manufactured materials But too often we create hazards for the ecosystem and human health as we mine process distribute use and dispose of these materials Until recently most research has focused on the waste end of material cycles This book argues that the safest and least costly point at which to avoid environmental damage is when materials are first designed and selected for use in industrial production Materials Matter presents convincing evidence that we can use fewer materials and eliminate the use of many toxic chemicals by focusing directly on material chemical use when products are designed It also shows how manufacturers can save money by increasing the effectiveness of material use and reducing the use of toxic chemicals It advocates new directions for the material sciences and government policies on materials And it argues that manufacturers suppliers and customers need to set more socially responsible policies for products and services to achieve higher environmental and health goals [The Potential of U.S. Cropland to Sequester Carbon and Mitigate the Greenhouse Effect](#) John M. Kimble, Ronald F. Follett, C. Vernon Cole, 1998-08-01 This report assesses the potential of U S cropland to sequester carbon concluding that properly applied soil restorative processes and best management practices can help mitigate the greenhouse effect by decreasing the emissions of greenhouse gases from U S agricultural activities and by making U S cropland a major sink for carbon sequestration Topics include Describe the greenhouse processes and global trends in emissions as well as the three principal components of anthropogenic global warming potential Present data on U S emissions and agriculture's related role Examines the soil organic carbon SOC pool in soils of the U S and its loss due to cultivation Provides a reference for the magnitude of carbon sequestration potential Analyzes the primary processes governing greenhouse gas emission from the pedosphere Establishes a link between SOC content and soil quality Outlines strategies for mitigating emissions from U S cropland Discusses soil erosion management Assesses the potential of using cropland to create biomass for direct fuel to produce power Details the potential for sequestering carbon by intensifying prime agricultural land The Potential of U S Cropland to Sequester Carbon and Mitigate the Greenhouse Effect provides an exceptional framework for the adoption of science based management methods on U S cropland encouraging appropriate agricultural practices for the sustainable use of our natural resources and the improvement of our nation's environment [Design for Sustainability](#) Janis Birkeland, 2012-05-04 With radical and innovative design solutions everyone could be living in buildings and settlements that are more like gardens than cargo containers and that purify air and water generate energy treat sewage and produce food at lower cost Birkeland introduces systems design thinking that cuts across academic and professional boundaries and the divide between social and physical

sciences to move towards a transdisciplinary approach to environmental and social problem solving This sourcebook is useful for teaching as each topic within the field of environmental management and social change has pairs of short readings providing diverse perspectives to compare contrast and debate Design for Sustainability presents examples of integrated systems design based on ecological principles and concepts and drawn from the foremost designers in the fields of industrial design materials housing design urban planning and transport landscape and permaculture and energy and resource management
