ECOLOGICAL ADVENTURES IN THE OUTBACK
JOHN L. READ

Red Sand Green Heart

**Stephen Garnett, John Woinarski, David
Lindenmayer, Peter Latch**

Red Sand Green Heart:

Red Sand Green Heart John L. Read, 2020-01-31 Australia's arid outback is teeming with life when you know where to look. From taipan snakes and pelicans to hippie activists and hardline miners John Read brings to life the characters, creatures and cultures of the outback. Through vivid personal stories he shares his experience as an ecologist making new discoveries, challenging conventional approaches to pastoralism, mining, tourism and environmental management, and witnessing the precarious balance of nature as species are pitted against the harsh climate of the outback. Written in an accessible and non-scientific style, *Red Sand Green Heart: Ecological adventures in the outback* evokes a humorous, entertaining and informative picture of Australia's desert region and the environmental issues that affect us all. *Red Sand Green Heart* John L. Read, Arthur Whyte, 2020 Australia's arid outback is teeming with life when you know where to look. Written in an accessible and non-scientific style, *Red Sand Green Heart: Ecological adventures in the outback* evokes a humorous, entertaining and informative picture of Australia's desert region and the environmental issues that affect us all.

Red Sand Green Heart John Read, 2013 **Not Every Dog Has His Day** Jane Duckworth, 2009 Provides a balanced view on the many issues relating to the treatment and care of Australian dogs. *Boom & Bust* Libby Robin, Leo Joseph, Robert Heinsohn, 2009 Draws on the natural history of Australia's charismatic birds to explore the relations between fauna, people and environment. *Boom and Bust* Libby Robin, Robert Heinsohn, Leo Joseph, 2009-03-06 In *Boom and Bust* the authors draw on the natural history of Australia's charismatic birds to explore the relations between fauna, people and environment in a continent where variability is normal and rainfall patterns not always seasonal. They consider changing ideas about deserts and how these have helped us understand birds and their behaviour in this driest of continents. The book describes the responses of animals and plants to environmental variability and stress. It is also a cultural concept when it is used to capture the patterns of change wrought by humans in Australia where landscapes began to become cultural about 55 000 years ago as ecosystems responded to Aboriginal management. In 1788 the British settlement brought almost simultaneously both agricultural and industrial revolutions to a land previously managed by fire for hunting. How have birds responded to this second dramatic invasion? *Boom and Bust* is also a tool for understanding global change. How can Australians in the 21st century better understand how to continue to live in this land as its conditions are still dynamically unfolding in response to the major anthropogenic changes to the whole Earth system? This interdisciplinary collection is written in a straightforward and accessible style. Many of the writers are practising field specialists and have woven their personal field work into the stories they tell about the birds. *Australian Deserts* Steve Morton, 2022-02-01 *Australian Deserts: Ecology and Landscapes* is about the vast sweep of the Outback, a land of expanses making up three quarters of the continent, the heart of Australia. Steve Morton brings his extensive first-hand knowledge and experience of arid Australia to this book, explaining how Australian deserts work ecologically. This book outlines why unpredictable rainfall and paucity of

soil nutrients underpin the nature of desert ecosystems while also describing how plants and animals came to be desert dwellers through evolutionary time It shows how plants use uncertain rainfall to provide for persistence of their populations alongside outlines of the dominant animals of the deserts and explanations of the features that help them succeed in the face of aridity and uncertainty Richly illustrated with the photographs of Mike Gillam this fascinating and accessible book will enhance your understanding of the nature of arid Australia

Recovering Australian Threatened Species Stephen Garnett, John Woinarski, David Lindenmayer, Peter Latch, 2018-03-01 Australia's nature is exceptional wonderful and important But much has been lost and the ongoing existence of many species now hangs by a thread Against a relentless tide of threats to our biodiversity many Australians and government and non government agencies have devoted themselves to the challenge of conserving and recovering plant and animal species that now need our help to survive This dedication has been rewarded with some outstanding and inspiring successes of extinctions averted of populations increasing of communities actively involved in recovery efforts Recovering Australian Threatened Species showcases successful conservation stories and identifies approaches and implementation methods that have been most effective in recovering threatened species These diverse accounts dealing with threatened plants invertebrates fish reptiles birds and mammals show that the conservation of threatened species is achievable that it can be done and should be done They collectively serve to inform guide and inspire other conservation efforts This is a book of hope and inspiration It shows that with dedication knowledge and support we can retain and restore our marvellous natural heritage and gift to our descendants a world that is as diverse healthy and beautiful as that which we have inherited

Among the Pigeons John L. Read, 2019-05-06 During the last century global domestic cat numbers rocketed past 200 million along with a surge in cat diseases and numbers of feral cats and sick injured and malnourished cats Cat shelters are overflowing Hundreds of thousands of cats are euthanised every year by despondent animal welfare workers Misplaced sentimentality sometimes promoted by corporate greed of cat food companies has exacerbated this situation through promoting irresponsible feeding of strays Ecologist and author John Read has travelled the world consulting cat experts and collating the most recent science In Among the Pigeons he balances the allure of indoor cats with the animal welfare human health and conservation issues they create when allowed to roam But he also presents solutions from breeding ideal indoor pet cats to development of humane and targeted tools to control feral cats In striking parallel to the repercussions of human induced climate change warnings about the damage wrought by free ranging cats have been largely denied or overlooked But we ignore these issues at our peril For our own mental health and endangered wildlife worldwide time is running out

Dear Grandpa, Why? John L. Read, 2018-06-07 Dear Grandpa why is a question that has been asked many times over by descendants of those who have died in war John L Read however has placed his energy into actually seeking an answer to his own question Hon Sir Eric Neal AC CVO Edward Thompson Mobsby father of twin baby girls volunteered for war service and was shot down by the Japanese in New Guinea in 1942 John Read's

quest for an apology for the death of his grandfather took him and his family from suburban Australia to a startling discovery in the mighty Owen Stanley Ranges and on to Hiroshima John learned about Miyuki a Japanese woman who had also taken her mother to New Guinea to answer questions about her grandfather s death When they eventually met in Osaka their long conversations brought understanding reconciliation and almost forgiveness And critically revealed the value of cross cultural dialogue in helping spare future generations from the despair and waste of international conflict John L Read s odyssey provides a historical insight into the cause of the war against Japan and a graphic portrayal of the cultural grief experienced by families who lost loved ones Charlie Lynn Kokoda Treks
