also contain them There are many reasons particular flora and fauna may be unwanted from the physical to the psychological Sometimes they may possess inherent qualities that when revealed help us to interrogate human perception and our relationship to an unwanted other Pandora's Garden is primarily about creatures that humans don't get along with such as rattlesnakes and sharks but the chapters also take on a range of other subjects including stolen children in Australia the treatment of illegal immigrants in Texas and the disgust function of the human limbic system Peters interweaves these diverse subjects into a whole that mirrors the evolving and interrelated world whose surprises and oddities he delights in revealing
