Redefining Linguistics:

Redefining Linguistics (RLE Linguistics A: General Linguistics) Hayley G. Davis, Talbot J. Taylor, 2014-02-03 The academic discipline of linguistics is at a critical stage of development Whatever consensus there may have been fifteen or even ten years ago is fast disappearing A process of redefinition is underway and it is the aim of this volume to contribute to that process explain why a redefinition is needed and how it should proceed In the case of linguistics the subject is also the subject matter Many linguists have ignored the problem of definition simply regarding linguistics as the science of language itself What though is language itself Is it a language ie English Swahili Or language in a more general sense The primary goal of a redefinition of linguistics should be to demonstrate that language is not an objective matter Linguistics is and should be the study of whatever is linguistically pertinent A linguistics redefined would look at how we interpret and construct our day to day communication acts what views of language are shared by and opposed by societies and the source and roles that these views play in our living and learning experience These papers argue the case for such a redefinition more explicitly than has ever been done before in modern linguistic theory Such a redefined perspective precisely because it is a perspective subject to outside influence and in constant dialogue with the perspective of the other human sciences must be endlessly redefined

Rethinking Linguistics Hayley G. Davis, Talbot J. Taylor, 2003-09-02 Rethinks the aims and methods of contemporary linguistics Uses integrationist theory to exemplify how language users become language makers

particular use *The Reflexivity of Language and Linguistic Inquiry* Dorthe Duncker, 2018-11-09 This book explores the reflexivity of language both from the perspective of the lay speaker and the linguistic analyst Linguistic inquiry is conditional upon linguistic reflexivity but so is language Without linguistic reflexivity we would not be able to make sense of everyday linguistic communication and the idea of a language would not be conceivable Not even fundamental notions such as words or meaning would exist Linguistic reflexivity is a feature of the communication process and it essentially depends on situated participants and time It is a defining characteristic of the human language but despite its obvious importance it is not very well understood theoretically and it is strangely under researched empirically Throughout history and in modern linguistics it has mostly either been taken for granted misconstrued or ignored Only integrational linguistics fully recognizes its specifically linguistic implications However integrational linguistics does not provide the necessary methodological basis for investigating linguistic phenomena empirically This catch 22 situation means that the goal of the book is twofold one part is to explore the reflexivity of language theoretically and the other part is to propose an applied integrational linguistics and to implement this proposal in practice **Signs in Activities** Dorthe Duncker, Adrian Pablé, 2024-03-27 This book is a collective volume bringing together scholars who share an interest in linguistics from an integrational point of view and in developing new directions for future scholarship Integrational linguistics invites us to rethink the theoretical and methodological premises of general linguistics by drawing on a different conception of the sign and by recognizing the creativity that human communication requires Some chapters are concerned with concepts like the sign contextualization activity and integration Although being core concepts developed by the founder of integrational linguistics Roy Harris they have arguably remained underdeveloped in Harris writings and thus call for further clarification and investigation Other chapters are concerned with the notions of the self and the social experience and interaction with questions about individual agency and will and human sociality and social organization which all occupy a central position in integrational theory Finally remaining chapters focus on how scriptism and the language myth have influenced our way of thinking about communication in a broad sense This edited collection will be of interest to a multidisciplinary readership comprising those engaged in study teaching and research in the humanities and social sciences including anthropology the arts education linguistics literary studies philosophy psychology and semiotics Models of the Human in Twentieth-Century Linguistic Theories Feifei Zhou, 2020-03-17 This book provides a refreshingly new perspective for investigating linguistic texts which foregrounds models of the human It presents a close reading of major linguistic theories in the twentieth century with a focus on three main themes linguistic system and the individual speaker social order and linguistic creativity The examination of these three fundamental themes concerning language and human nature on the one hand provides a fine textured exposition on the implicit and explicit models of human nature endorsed by major theorists on the other it reveals the methodological dilemmas faced by linguistics In light of the fact that the importance of considering posthumanist ideas is increasingly being

underscored today both within and outside linguistics this focus on the human makes the book highly topical *Expanding the Linguistic Landscape* Martin Pütz, Neele-Frederike Mundt, 2018-12-20 This book provides a forum for theoretical methodological and empirical contributions to research on language s multimodality and public space which will advance new ways of understanding the sociocultural ideological and historical role of communication practices and experienced lives in a globalised world Linguistic Landscape is viewed as a metaphor and expanded to include a wide variety of discursive modalities imagery non verbal communication silence tactile and aural communication graffiti smell etc The chapters in this book cover a range of geographical locations and capture the history motives uses causes ideologies communication practices and conflicts of diverse forms of languages as they may be observed in public spaces of the physical environment The book is anchored in a variety of theories methodologies and frameworks from economics politics and sociology to linguistics and applied linguistics literacy and education cultural geography and human rights **Sociolinguistics and Language Education** Nancy H. Hornberger, Sandra McKay, 2010 This book provides an up to date overview of sociolinguistics including topics of nationalism and popular culture style and identity creole languages critical language awareness multimodal literacies classroom discourse ideologies and power across language education contexts ranging from the teaching of English as an international language to Indigenous language revitalization **The New Psychology of Language** Michael Tomasello, 2017-07-05 This book which gathers in one place the theories of 10 leading cognitive and functional linguists represents a new approach that may define the next era in the history of psychology It promises to give psychologists a new appreciation of what this variety of linguistics can offer their study of language and communication In addition it provides cognitive functional linguists new models for presenting their work to audiences outside the boundaries of traditional linguistics Thus it serves as an excellent text for courses in psycholinguistics and appeal to students and researchers in cognitive science and functional linguistics [The Routledge Handbook of Language and Creativity](#) Rodney H. Jones, 2015-09-08 The Routledge Handbook of Language and Creativity provides an introduction to and survey of a wide range of perspectives on the relationship between language and creativity Defining this complex and multifaceted field this book introduces a conceptual framework through which the various definitions of language and creativity can be explored Divided into four parts it covers different aspects of language and creativity including dialogue metaphor and humour literary creativity including narrative and poetry multimodal and multimedia creativity in areas such as music graffiti and the internet creativity in language teaching and learning With over 30 chapters written by a group of leading academics from around the world The Routledge Handbook of Language and Creativity will serve as an important reference for students and scholars in the fields of English language studies applied linguistics education and communication studies *Linguistics* H.
