Redefining Security In The Middle East:

Redefining Security in the Middle East Tami Amanda Jacoby, 2013-07-19 The end of the Cold War brought about fundamental shifts in the international political system but these have been slow to reach the Middle East This text aims to put forward new concepts policies and discourses about security discussing a broader terrain for debate on the region

Redefining security in the Middle East Tami Jacoby, Brent Sasley, 2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license For over five decades the Cold War security agenda was distinguished by the principal strategic balance that of a structure of bipolarity between the United States US and the Soviet Union USSR This book seeks to draw from current developments in critical security studies in order to establish a new framework of inquiry for security in the Middle East It addresses the need to redefine security in the Middle East The focus is squarely on the Arab Israeli context in general and the Palestinian Israeli context in particular The character of Arab Israeli relations are measured by the Israeli foreign policy debate from the 1950s to the 1990s A dialogue between Islam and Islamism as a means to broaden the terrain on which conflict resolution and post bipolar security in the Middle East is to be understood is presented The Middle East peace process MEPP was an additional factor in problematizing the military strategic concept of security in the Middle East The shift in analysis from national security to human security reflects the transformations of the post Cold War era by combining military with non military concerns such as environmental damage social unrest economic mismanagement cultural conflict gender inequity and radical fundamentalism By way of contrast to realist international relations IR theory developing world theorists have proposed a different set of variables to explain the unique challenges facing developing states Finally the book examines the significance of ecopolitics in security agendas in the Middle East

Regional Security in the Middle East Pinar Bilgin, 2004-09-09 This is an accessible yet critical analysis of regional security in the Middle East Using a non realist approach Bilgin provides a comprehensive study of the past present and future of security in the region She also considers the question of identity formation explaining how and why various regional representations came into being and explor

Redefining Security David T. Graham, Nana Poku, 1998-10-30 International migration has become a major domestic political issue in many countries and a major topic of international debate Thus far most of the attention has centered on the plight of refugees or on ways to curb the flow of illegal immigrants As more and more migrants cross interstate boundaries however governments are realizing that immigration and asylum problems cannot be separated from broader socio economic and political issues nor can they be resolved by countries acting unilaterally Even with this understanding attempts to develop multilateral strategies to ease international tensions arising from uncontrolled migration will be complicated by economic disparities regional political tensions and mounting population and ecological pressures Internal migration particularly in terms of forced resettlement and urbanization also gives rise to a myriad of problems relating to aspects of security The increase in other major population

movements such as tourism and business travel also has implications for security. Until recently the question what is security was rarely asked in the context of these developments. This was because there was a perceived consensus on what the nature of security was. The nature of security was held to mean national political and military security. Thus security was virtually synonymous with defense. The theoretical claim of this volume is that these developments are necessitating a redefinition of security. This volume provides major theoretical analyses of these trends as well as in depth case studies that explore specific developments of major concern to scholars and other researchers involved with international relations, migration and development issues.

Regional Security in the Middle East, *Human Security in the Middle East and North Africa* Alaa Al-Din Arafat, 2024-12-20. This book analyzes major human security threats in the MENA region including food, water, energy, climate and health security. It also examines sectarian conflict, terrorism and poverty in the region. The author highlights the relationship between human security concerns and conventional or military security threats. He demonstrates how MENA nations failed to respond to the region's human security threats and to develop a human security formula and regional security architecture that included both human and conventional security threats. Therefore, this book concludes that the MENA region's future will be determined by its governments' ability to address human security threats.

Socio-Political Order and Security in the Arab World Andreas Krieg, 2017-03-27. This book examines the connection between socio-politics and security in the Arab World. In an effort to understand the social and political developments that have been ongoing in the Arab World since the 1990s, culminating in the Arab Spring, Krieg moves beyond liberal deterministic assumptions, most notably that the promotion of liberal values and democracy are the panacea for the structural problems of the region. Instead, this text advances the case that grievances related to individual security needs are at the heart of regional insecurity and instability. Looking towards the future, the author asserts that regimes can only be resilient if they are able to provide for individual security inclusively. When regimes fail to cater for public security, they might be replaced by alternative non-state security providers.

Emerging Security Threats in the Middle East Ashok Swain, Anders Jägerskog, 2016-04-12. Increasingly, the Middle East and its growing population face a highly complex and fragile security system. The rich deposits of natural resources such as oil and gas suffer from a strained renewable resource base that includes water and arable land. This leads to water scarcity, desertification and land degradation. Increasing population, industrialization and urbanization put more and more demand on the food supply. Energy insecurity may not be generally associated with the Middle East, but the countries in the eastern Mediterranean part have been traditionally vulnerable to it as their fossil fuel endowments have been low. Another issue is the large-scale temporary labor migration and the large number of forced migrants, refugees and internally displaced persons. The book analyzes these emerging security challenges in a comprehensive and systematic manner. It draws national and regional security issues into both the global security and human security perspectives.

World Society and the Middle East S. Stetter, 2008-07-11. Offers a novel

cross disciplinary theoretical perspective on conflict and conflict transformation in world society and integrates the study of conflicts in the Middle East region into a modern systems theoretical framework **The Many Faces of National Security in the Arab World** Rex Brynen, Bahgat Korany, Paul Noble, 2016-07-27 Two Gulf wars and the continuing Arab Israeli conflict have highlighted the salience of military factors in the Middle East This book argues however that many of the most serious security challenges to Arab states and societies are rooted not in external military threats but in the imperatives of socio economic development Contributors examine the regional security environment the social and political impact of regional militarization and underdevelopment as a source of regional insecurity **Water Resources in the Middle East** Hillel Shuval, Hassan Dweik, 2007-07-30 Israeli Palestinian Water Issues From Conflict To Cooperation This book Israeli Palestinian Water Issues From Conflict to Cooperation authored by a group of leading Palestinian Israeli and international water experts is a unique and timely document illustrating the importance of mutual understanding respect and amity among peoples during a difficult period of stress whose leaders sadly have not yet found the way of resolving the conflicts between them and of living in peace with each other Nevertheless it is a book which demonstrates hope optimism and belief that people with good will in their hearts can help contribute to finding the way to peace and mutual cooperation in solving shared problems essential for their mutual survival and welfare and The participants in the 2 Israeli Palestinian International Conference on Water for Life in the Middle East held in Antalya Turkey in October 2004 which served as the source of most of the papers in this book concluded the Conference with the following declaration We two hundred participants in this Israeli Palestinian International Conference complete our conference with a sense of optimism It is clear that the Palestinian and Israeli participants along with their international partners remain committed to solving the many challenges associated with water quantity and quality in our region **Human Security and the Environment** Edward Page, M. R. Redclift, 2002-01-01 In the post Cold War era the pre eminent threats to our security derive from human degradation of vital ecosystems as well as the possibility of war and terrorist attack This substantial book examines this new security environment paradigm and the way in which the activities of societies are shifting the balance with nature The distinguished authors investigate this redefinition of security with particular reference to environmental threats such as climate change and the availability of adequate supplies of food and water They illustrate how unfettered economic growth rising levels of personal consumption and unsustainable natural resource and energy procurement are taking a heavy toll on the global environment This in turn is forcing both developed and developing countries to re evaluate the more immediate environmental security of their own populations For a truly global perspective the authors present a series of country case studies looking at issues of security and environment and comparing how they influence policy and human well being They also discuss a number of theoretical issues which underpin discussions of environmental security demonstrating that this is a relatively new and essentially contested concept

Jordan's Inter-Arab Relations Laurie Brand, 1995-01-05 Lisa Anderson Columbia University **Thinking**

International Relations Differently Arlene Tickner, David L. Blaney, 2013-03-01 A host of voices has risen to challenge Western core dominance of the field of International Relations IR and yet intellectual production about world politics continues to be highly skewed This book is the second volume in a trilogy of titles that tries to put the international back into IR by showing how knowledge is actually produced around the world The book examines how concepts that are central to the analysis of international relations are conceived in diverse parts of the world both within the disciplinary boundaries of IR and beyond them Adopting a thematic structure scholars from around the world issues that include security the state authority and sovereignty globalization secularism and religion and the international an idea that is central to discourses about world politics but which in given geocultural locations does not necessarily look the same By mapping global variation in the concepts used by scholars to think about international relations the work brings to light important differences in non Western approaches and the potential implications of such differences for the IR discipline and the study of world politics in general This is essential reading for anyone who is concerned about the history development and future of International Relations

Regional Insecurity After the Arab Uprisings E. Monier, 2015-06-11 This book presents an in depth exploration of the impact of the Arab Uprisings on the relationship between constructions of in security narratives of threat and patterns of socio political change within the Middle East and North Africa region It also offers insights into the study of regional security and the operation of threat perceptions

Cooperating Rivals Jeffrey K. Sosland, 2012-02-01 This book examines the politics of water scarcity in the Middle East s Jordan River Basin Syria Lebanon Jordan Israel and the Palestinian Authority between 1920 and 2006 Jeffrey K Sosland demonstrates that while water scarcity might generate political tension it does not by itself precipitate war nor is it likely to do so At the same time efforts to promote water cooperation such as those initiated by the United States have an identifiable political benefit by creating rules building confidence and reducing tensions among adversaries Sosland concludes that while this alone might not resolve the overall conflict it does create positive long term value in achieving peace
