Redesigning The World:

Redesigning The World Sam Pitroda, 2021-04-26 The world was last designed seventy five years ago about the same time that Sam Pitroda was born This design has outlived its utility Hyperconnectivity and the COVID 19 pandemic offer a unique opportunity to redesign the world to take humanity to the next level Redesigning the world is not about looking at it from the point of view of liberal or conservative left or right capitalism or socialism public or private democracy dictatorship or monarchy open or closed systems rich or poor urban or rural east or west white brown black or yellow This proposed redesign of the world has the planet and its people at the centre it is built on the foundations of sustainability inclusion equality equity and justice so that everyone on earth can enjoy peace and prosperity It is not an idealist or utopian vision but one with humanity at its core This book is about reshaping the world to meet the future challenges of our planet and our people

Disruptive Technologies, Innovation and Global Redesign: Emerging Implications Ekekwe, Ndubuisi, Islam, Nazrul, 2012-02-29 This book provides case studies as well as practical and theoretical chapters on the issues surrounding disruptive technologies innovation and global redesign Provided by publisher

Making Global Trade Governance Work for Development Carolyn Deere Birkbeck, 2011-08-18 Discussion of the governance of global trade and the multilateral trading system is too often dominated by developed country scholars and opinion makers with inadequate attention given to developing country perspectives Making Global Trade Governance Work for Development gathers a diversity of developing country views on how to improve the governance of global trade and the WTO to better advance sustainable development and respond to the needs of developing countries With contributions by senior scholars commentators and practitioners the essays combine new empirically grounded research with practical insights about the trade policy making process They consider the specific governance issues of interest to developing countries and acknowledge the changing dynamics in the global economy and in trade decision making

Redesign the World - A Global Call to Action Sam Pitroda, 2021-05-04 The world was last designed seventy five years ago about the same time that Sam Pitroda was born This design has outlived its utility Hyperconnectivity and the COVID 19 pandemic offer a unique opportunity to redesign the world to take humanity to the next level Redesigning the world is not about looking at it from the point of view of liberal or conservative left or right capitalism or socialism public or private democracy dictatorship or monarchy open or closed systems rich or poor urban or rural east or west white brown black or yellow This proposed redesign of the world has the planet and its people at the centre it is built on the foundations of sustainability inclusion equality equity and justice so that everyone on earth can enjoy peace and prosperity It is not an idealist or utopian vision but one with humanity at its core This book is about reshaping the world to meet the future challenges of our planet and our people The three dimensions In the third vision he calls for nations networking ideas interests resources and talent all designed to save our planet and uplift all our people This vision will be based on a novel organizational architecture focussed on global consultations collaboration co operation and enhanced

communication He lays out what he sees as the three dimensions of the information age connectivity content and context There is also reference to three unique dimensions of information technology democratisation decentralisation and demonetisation Then there are five new pillars for the world s redesign inclusion human needs new economy sustainability conservation and non violence There are multiple valid points such as the need to discard the use of over simplistic and inadequate tools such as GDP to measure economic growth and well being The book stresses on the need to keep environmental concerns central to any new policy making pointing out that the planet can survive without people but people cannot survive without a healthy planet Our priority during the world s redesign has to be to improve our planet s health and make it more clean diverse prosperous and sustainable a place where each plant and form of life can flourish and live to its fullest potential Perhaps the most heartfelt section of the book is one at the end entitled Who Am I to Write This Book in which he delves into his motives for penning this book The book offers a much needed manifesto that can guide the world to better healthier sustainable human life However in a bitterly divided world with governments turning towards populism nationalism and brutality to crush change political will at the highest level one the crucial elements that would make the manifesto possible seems to be unachievable at the moment He urges us to recognise how Covid has underscored how interconnected we are but few seem to be able to recognise this not the least India currently facing unprecedented challenges to save lives As a manifesto a wish list for the next 75 years this is a wonderful even inspiring read The challenge is to make the powers that be accept this vision

Next Generation Course Redesign Philip M. Turner, Ronald S. Carriveau, 2010 There is widespread recognition that large enrollment introductory classes are a significant problem Lack of engagement incongruous learning styles and teaching methods and high failure dropout rates are some of the symptoms The University of North Texas has developed and promulgated a process for redesigning these classes that brings to bear the creativity of the faculty resulting in higher level student learning without increasing instructional costs This groundbreaking book provides the reader with a theoretical foundation for course redesign that employs assessment driven experiential learning and tools and examples to bring all or part of the process to their campus Back cover

How to Run the World Parag Khanna, 2011-01-11 Here is a stunning and provocative guide to the future of international relations a system for managing global problems beyond the stalemates of business versus government East versus West rich versus poor democracy versus authoritarianism free markets versus state capitalism Written by the most esteemed and innovative adventurer scholar of his generation Parag Khanna s How to Run the World posits a chaotic modern era that resembles the Middle Ages with Asian empires Western militaries Middle Eastern sheikhdoms magnetic city states wealthy multinational corporations elite clans religious zealots tribal hordes and potent

Murphy,2021-03-30 The first global history of voluntary consensus standard setting Finalist Hagley Prize in Business History The Hagley Museum and Library The Business History Conference Private voluntary standards shape almost everything we use from screw threads to shipping containers to e readers They have been critical to every major change in the world economy for more than a century including the rise of global manufacturing and the ubiquity of the internet In *Engineering Rules* JoAnne Yates and Craig N Murphy trace the standard setting system s evolution through time revealing a process with an astonishingly pervasive if rarely noticed impact on all of our lives This type of standard setting was established in the 1880s when engineers aimed to prove their status as professionals by creating useful standards that would be widely adopted by manufacturers while satisfying corporate customers Yates and Murphy explain how these engineers processes provided a timely way to set desirable standards that would have taken much longer to emerge from the market and that governments were rarely willing to set By the 1920s the standardizers began to think of themselves as critical to global prosperity and world peace After World War II standardizers transcended Cold War divisions to create standards that made the global economy possible Finally Yates and Murphy reveal how since 1990 a new generation of standardizers has focused on supporting the internet and web while applying the same standard setting process to regulate the potential social and environmental harms of the increasingly global economy Drawing on archival materials from three continents Yates and Murphy describe the positive ideals that sparked the standardization movement the ways its leaders tried to realize those ideals and the challenges the movement faces today *Engineering Rules* is a riveting global history of the people processes and organizations that created and maintain this nearly invisible infrastructure of today s economy which is just as important as the state or the global market
