Reducing Poverty In Asia Emerging Issues In Growth Targeting And Measurement:

Reducing Poverty in Asia Christopher M. Edmonds, Asian Development Bank, 2003-01-01 In this book a group of distinguished authors addresses three broad questions what broad strategies and macroeconomic policies best support poverty reduction efforts in Asia what role should targeted antipoverty interventions play and how should such interventions be designed and how is poverty measured what new approaches are needed and how does measurement affect our understanding of poverty Each of these three broad themes is also considered together in chapters examining the poverty situations in a number of countries in Asia and the Pacific *Finance, Development, and the IMF* James M. Boughton, Domenico Lombardi, 2009-06-25 This book provides an assessment of the role of the International Monetary Fund in poor countries In recent years a large portion of the work of the IMF has focused on the economies of low income countries by aiming to create conditions conducive to poverty reduction and stable economic growth More than two fifths of the IMF's 185 members are low income countries and many others have substantial pockets of poverty in their populations Since economic development and the reduction of poverty are the most important economic challenges that these countries face how can the IMF best help them How can the imperative of macroeconomic and financial stability be reconciled with the requirements for sustained economic growth This volume brings together the research of leading economists political scientists and historians to suggest ways for the IMF to address these issues effectively *Practices of Poverty Measurement and Poverty Profile of Nepal* Devendra Chhetry, 2009-03 Reviews the poverty measuring practices available measures of poverty and economic growth figures of Nepal The poverty rates for FY 1976 77 1984 85 and 1995 96 are found to be not comparable due to change in methodology over time The three poverty rates average 40% Nepal has experienced high economic growth during the 7th 1985 86 to 1989 90 and 8th 1992 93 to 1996 97 Plan periods with no strong evidences of poverty reduction This incompatible result is partially explained by comparing growth of the agricultural sector with the role of the sector in providing employment and income generation at the household level and by comparing social indicators particularly literacy rate with the growth of the nonagricultural sector Tables *Disaster Relief in the Asia Pacific* Minako Sakai, Edwin Jurriëns, Jian Zhang, Alec Thornton, 2014-01-03 A UN report recently found that the Asia Pacific is the world's most disaster prone region Indeed considering that the region accounts for more than half of the total number of disasters in the world building capacity and resilience to mitigate the devastating impact of disasters is a pressing task for local actors This book takes a regional multidisciplinary and multi actor approach to improve understandings of how various actors respond to natural and human induced disasters in the Asia Pacific region It examines the ideas and activities of four different categories of agents civil society military and state institutions local cultural knowledge and the media and economic initiatives and these themes are approached from various academic disciplines ranging from anthropology and cultural studies to economics human geography and political science The contributors draw their findings from a variety of

countries in the region including China Fiji India Indonesia Japan Myanmar and Samoa and importantly focus on the interconnection between vulnerability and resilience In turn the book highlights how the nature and magnitude of disasters are influenced by social conditions and aims to contribute to policies that prioritize development opportunities to enhance resilience Further it explores the complicated and multifaceted role of agency in building resilience and presents a comparative framework for analysis and key findings from the Asia Pacific region The focus of this book on recent and ongoing disasters makes it a topical and timely contribution to the growing field of disaster management and as such it will appeal to students and scholars of environmental studies development studies and Asian politics **Poverty in Asia** ,2004
