Yield Unit and the Gila Wilderness Area while also drawing on issues and concerns about similar biospheres in other parts of the West Over the past century forest management has evolved from a field dominated by the conservationist perspective with humans exploiting natural resources to one that emphasizes biocentrism in which forests are seen as dynamic ecosystems Yet despite this progressive shift the assault on our forests continues through overgrazing of rangelands lumbering eroding mountainsides fire suppression and threats to the habitats of endangered species Forests under Fire takes a closer look at the people calling the shots in our national forests from advocates of timber harvesting to champions of ecosystem management and calls for a reassessment of our priorities before our forests are gone
