Samuel Barkin,2012-02-01 While other studies of international leadership have looked at a variety of measures to predict behavior this book demonstrates that the key factor is international finance J Samuel Barkin uses an innovative blend of rationalist and constructivist methodologies approaches to international political economy that normally exist in isolation from one another Barkin argues that the level of a country s involvement in international finance specifically motivates it to lead This is particularly relevant today given the on going discussions on how to respond to local and global financial crises Barkin illustrates his theory with an episodic history of international monetary leadership over the last four centuries Dutch leadership in the seventeenth century British leadership in the nineteenth the failure of leadership in the interwar era and Great Depression and the role of the U S in the construction of an international economic infrastructure since World War II

Decolonizing the Social Sciences and the Humanities Bernd Reiter,2021-12-30 In *Decolonizing the Social Sciences and the Humanities* Bernd Reiter contributes to the ongoing efforts to decolonize the social sciences and humanities by arguing that true decolonization implies a liberation from the elite culture that Western civilization has perpetually promoted Reiter brings together lessons learned from field research on a Colombian indigenous society a maroon society also in Colombia from Afro Brazilian religion from Spanish Anarchism and from German Council democracy and from analyzing non Western

ontologies and epistemologies in general He claims that once these lessons are absorbed it becomes clear that Western civilization has advanced individualization and elitism The chapters present the case that human beings are able to rule themselves and have done so for some 300 000 years before the Neolithic Revolution Self rule and rule by councils is our default option once we rid ourselves of leaders and rulers Reiter concludes by considering the massive manipulations and the heinous divisions that political elitism dressed in the form of representative democracy has brought us and implores us to seek true freedom and democracy by liberating ourselves from political elites and taking on political responsibilities

Decolonizing the Social Sciences and the Humanities is written for students scholars and social justice activists across cultural anthropology sociology geography Latin American Studies Africana Studies and political science *History of Political Ideas* Eric Voegelin, 1997 The series will publish all of philosopher Voegelin's 1901-1985 works including the previously unpublished multi-volume *History of Political Ideas* of which this is the second volume Completed in 1944 it is not a conventional chronological account but an original comprehensive account of the political thought and experiential underpinnings that typified the medieval period A survey of the structure of the period is followed by analysis of the Germanic invasions the fall of Rome and the rise of empire and monastic Christianity climaxing in a study of Saint Thomas Aquinas Annotation copyrighted by Book News Inc Portland OR
