upheaval as new scientific linguistic educational and mathematical ideas flourished around the world Alice in Space explores these historic currents revealing essential context for Carroll's jokes concerns and hidden references Parody and Punch evolutionary debates philosophical dialogues educational works for children math and logic manners and rituals dream theory and childhood studies all fueled the fireworks of Carroll's restless imagination In this lively investigation Gillian Beer convincingly shows him at play in the spaces of Victorian cultural and intellectual life drawing on then current controversies reading prodigiously across many fields and writing on multiple levels to please both children and adults in different ways With a welcome combination of learning and lightness Beer reminds us that Carroll's books are essentially about the risks and pleasures of curiosity Along the way Alice in Space shares Alice's exceptional ability to spark curiosity in us too

Portrait of Jeanne Kéfer Michel Draguet, 2004 The book places this painting in the historical context of Khnopff's times and social milieu and traces the advent of Symbolism as a literary and artistic movement An analysis of the portrait itself is supported by an array of related paintings details and technical photographs Finally the author uses Khnopff's portraits as a taking off point for a broader discussion of Symbolist art BOOK JACKET *Lewis Carroll* Angelica Shirley Carpenter, 2003-01-01 A biography of the mathematician teacher photographer and author who wrote Alice in Wonderland

The Face of Britain Simon Schama, 2016-08-16 Author of a number of celebrated works including the bestselling *The Story of the Jews* and *Citizens A Chronicle of the French Revolution* Simon Schama's latest book fuses history and art to create a tour de force of narrative sweep and illuminating insight Using images from works paintings photographs lithographs etchings sketches found in London's National Portrait Gallery *The Face of Britain* weaves together an account of their composition framed by their particular moment of creation and in the process unveils a collective portrait of nation and its history Portraits Schama writes have always been made with an eye to posterity Commissioned to paint Winston Churchill in 1954 Graham Sutherland struggled with how to capture the savior of Great Britain honestly and humanely Schama calls the portrait initially damned the most powerful image of a Great Briton ever executed Annie Leibovitz's photograph of a nude John Lennon kissing Yoko Ono taken five hours before his murder bears a weight of poignancy she could not possibly have anticipated Hans Holbein's preparatory sketch for a portrait of Henry VIII depicts an unstoppable engine of dynastic generation Here are expressions from across the centuries of normalcy and heroism beauty and disfigurement aristocracy and deprivation the familiar and the obscure the faces of courtesans warriors workers activists playwrights the high and mighty as well as pub crawlers Linking them is Schama's vibrant exploration of how their connective power emerges from the dynamic between subject and artist work and viewer time and place Schama's compelling analysis and impassioned evocation of these works create an unforgettable verbal mosaic that at once reveals and transforms the images he places before us Lavishly illustrated and written with the storytelling brio that is Schama's trademark *The Face of Britain* invites us to look at a nation's visual legacies and find its reflection **The Mathematical World of Charles L. Dodgson (Lewis**

Carroll) Robin Wilson, Amirouche Moktefi, 2019-02-14 Charles Lutwidge Dodgson is best known for his Alice books *Alice's Adventures in Wonderland* and *Through the Looking Glass* written under his pen name of Lewis Carroll. Yet whilst lauded for his work in children's fiction and his pioneering work in the world of Victorian photography, his everyday job was a lecturer in Mathematics at Christ Church Oxford University. *The Mathematical World of Charles L. Dodgson* Lewis Carroll explores the academic background behind this complex individual, outlining his mathematical life, describing his writings in geometry, algebra, logic, the theory of voting and recreational mathematics, before going on to discuss his mathematical legacy. This is the first academic work that collects the research on Dodgson's wide-ranging mathematical achievements into a single practical volume. Much material appears here for the first time, such as Dodgson's personal letters and drawings, as well as the results of recent investigations into the life and work of Dodgson. Complementing this are many illustrations, both historical and explanatory, as well as a full mathematical bibliography of Dodgson's mathematical publications. *Twice-Told Children's Tales* Betty Greenway, 2013-09-13 It is only in childhood that books have any deep influence on our lives. Graham Greene: 'The luminous books of our childhood will remain the luminous books of our lives.' Joyce Carol Oates: 'Writers, as they often attest, are deeply influenced by their childhood reading.' Salman Rushdie, for example, has said that *The Wizard of Oz* made a writer of me. *Twice-Told Tales* is a collection of essays on the way the works of adult writers have been influenced by their childhood reading. This fascinating volume includes theoretical essays on Salman Rushdie and the *Oz* books, *Beauty and the Beast* retold as *Jane Eyre*, the childhood reading of Jorge Luis Borges, and the remnants of nursery rhymes in Sylvia Plath's poetry. It is supplemented with a number of brief commentaries on children's books by major creative writers, including Maxine Hong Kingston and Maxine Kumin. *Picturing Children* Marilyn R. Brown, 2017-07-05 The representation of children in modern European visual culture has often been marginalized by Art History as sentimental and trivial. For this reason, the subject of childhood in relation to art and its production has largely been ignored. Confronting this dismissal, this unique collection of essays raises new and unexpected issues about the formation of childhood identity in the nineteenth century and makes a significant contribution to the development of interdisciplinary studies within this area. Through a range of stimulating and insightful case studies, the book charts the development of the Romantic ideal of childhood, starting with Rousseau's *Emile* and attending to its visual, social and psychological transformations during the historical period from which Freud's psychoanalytic theories eventually emerged. Foremost scholars such as Anne Higonnet, Carol Mavor, Susan Casteras and Linda A. Pollock uncover the means by which children became an important conduit for prevailing social anxieties and demonstrate that the apparently timeless images of them that proliferated at the time should be understood as complex cultural documents. Over 50 illustrations enhance this rich and fascinating volume. *Photofile Lewis Carroll* Lewis Carroll, 2009-08-25 Charles Lutwidge Dodgson, better known by his pen name of Lewis Carroll, was an enigma: both a disciple of logic and a master of nonsense. Most famous for his imaginative masterpieces *Alice's Adventures in Wonderland* and

Through the Looking Glass he was also a keen and talented photographer His fascination with this pioneering new medium led him to take intensely atmospheric portraits of family members and friends and to create a series of haunting unforgettable and to modern eyes controversial images that record the beauty grace and innocence of Victorian childhood The Photofile series brings together the best work of the world's greatest photographers in an attractive format and at an easily affordable price Handsome and collectable the books are produced to the highest standards Each volume contains some sixty full page reproductions printed in superb duotone together with a critical introduction and a full bibliography The series was awarded the first annual prize for distinguished photographic books by the International Center of Photography New York

Strange Sisters Francesca Orestano, 2009 This collection of essays stems from the conference Nineteenth Century Literature and Aesthetics which was held at the University of Milan in 2006 and organised by the editors of this volume The interface between word and image covered in these essays embraces the fields of literature architecture painting photography music and art criticism The authors stress the role of aesthetics in a number of contexts ranging from the early 1830s to the fin de siècle and beyond as far as the last influences of Victorian taste on the early years of the twentieth century During the nineteenth century the ancient interaction between literature and aesthetics was challenged and criticised by Martineau Rossetti Ruskin Pater Wilde Beardsley Cameron and Carroll among others their awareness of the complexity of visual perception problematised the existing categories of realism artistic conventions discourse of description translation and representation The essays cover almost a century of debate between literature and aesthetics They focus on the intersection of word and image by emphasising transgressions in art hierarchies forms and languages which restyle existing categories and project them into new aesthetic dimensions beyond the conventional idea of the sister arts
