Reflections On Art A Source Of Writ:

A Corpus of Rembrandt Paintings V Ernst van de Wetering, 2013-12-12 This volume is the fifth volume of A Corpus of Rembrandt Paintings a project devoted to all Rembrandt's paintings This is the work of The Rembrandt Research Project consisting of a group of scholars led since 1993 by Professor Ernst van de Wetering The project began in 1968 with the aim of separating Rembrandt's own paintings from the vast number of Rembrandtesque paintings made by his many apprentices and followers Having opted for a chronological approach to the cataloguing of Rembrandt's paintings from 1625 till 1642 in the first three volumes it was decided in 1993 to adopt a thematic approach for further volumes This was largely to facilitate the recognition of different hands The new approach yielded much more information not only about Rembrandt's working methods but also about the function and meaning of his works This expanded field of view meant that etchings and drawings with similar themes also needed to be included In 2005 Volume IV appeared devoted to Rembrandt's self portraits in painting etching and drawing Volume V consists of a catalogue and analysis of the so called small scale history and genre paintings That theme was chosen because this type of complex work shows a variety of full length protagonists acting in different narrative settings For this reason in the 17th century painting etching or drawing biblical and mythological scenes was looked upon as an artist's greatest challenge The choice of this theme proved to be highly fruitful in several ways Small scale history pieces reveal Rembrandt's artistic ambitions most clearly They also offer the authors a much more accurate view of the daily routine in Rembrandt's studio his apprentices mostly copied this type of work or used it as a starting point for their own As a result it was easier to distinguish the works by the master himself from those of his pupils All aspects of the skills necessary to create a pictorial illusion play a part in the creation of small figured history paintings These aspects were referred to as the basis of the noble art of painting in Rembrandt's days Two seventeenth century painter theoreticians discussed these principles systematically in two books which up till now have only sporadically been consulted in the context of 17th century studio practice Karel van Mander wrote his *Grond der edel vry schilder const* Basis of the Art of Painting in 1604 and Samuel van Hoogstraten produced his *Inleyding tot de hooge schoole der schilder konst* Academy of Painting in 1678 Van Hoogstraten was a pupil of Rembrandt between 1642 and 48 Comparing the two books and considering them in relation to Rembrandt's oeuvre gradually reveals his original views on painting and how these had developed during his career Thus the authors of this new Volume of A Corpus have gained an unexpected and profound insight into Rembrandt's ideas and approach to his art The basic aspects of painting included the following topics function and methods of drawing human proportions various positions poses and gestures of figures ways of arranging a scene's protagonists in a composition facial expressions of a variety of emotions light shadows and reflected light landscape and animals draperies and articles of clothing methods of painting and various characteristics and uses of colours The way these basic aspects were selected and dealt with presumed that the more practical side to the art of painting would be learned by the apprentice in the daily routine

of his master's studio. With the development of art history in the nineteenth century the basic aspects of the art of painting listed above acquired the vague label of style. However the seventeenth century categorization of the basic aspects provides a much more acute means of probing the views and criteria for judging a painting by Rembrandt and his contemporaries than the concept of style. Volume V in the series *A Corpus of Rembrandt Paintings* breaks new ground from the point of view of art history not only in its approach to Rembrandt as an artist but more particularly to his thinking about painting. Moreover a detailed comparison of Rembrandt's works and those by his apprentices who based their works on his led to a profound and detailed understanding of Rembrandt's views on pictorial quality. In art historical literature quality usually does not feature prominently since it is regarded as being too subjective. This comparative approach together with the analysis of seventeenth century categories of thought about painting have given the research on Rembrandt a new impetus at the same time allowing us to see more clearly through seventeenth century eyes. That is why the new volume of the *Corpus* is an important publication not only for art historians but also for all who want to fully enjoy the numerous works of art that date back to the Dutch Golden Age now scattered in museums around the world.

Sources in Irish Art Fintan Cullen, 2000 The publication of these texts in a single volume enables the reader to create useful historical comparisons as well as facilitating the careful examination of historical documents. *Sources in Irish Art* will be an ideal text for Irish Studies and relevant Art History courses both at undergraduate and postgraduate levels.

Georg Simmel's Concluding Thoughts David Beer, 2019-03-15 This book draws upon the work of Georg Simmel to explore the limits, tensions and dynamism of social life through a close analysis of the works produced in the final years of his life and reveals what they might still offer some 100 years later. Focusing on the relationships between worlds, lives and fragments in these works David Beer opens up a conceptual toolkit for understanding life as both an individual experience and as a deeply social phenomenon. Taking the reader through artistic and musical forms of inspiration to the problems of culture and on to the conceptual understanding of lived experience the book illuminates the richness of Simmel's ideas and thinking. This sophisticated dialogue with Simmel's lesser known later works will provide fresh insights for students and scholars of cultural and social theory and pave the way for a reinvigorated engagement with his ideas.

The Cultural Post, 1980 **Carolina Quarterly**, 1958 **Great Thoughts from Classic Authors** Craufurd Tait Ramage, 1891 **Joseph Beuys and the Artistic Education** Carl-Peter Buschkühle, 2020-03-23 Joseph Beuys significantly influenced the development of art

in recent decades through his expanded definition of art In his art and reflections on art he raised far reaching questions on the nature of art and its central importance for modern education His famous claim Every human is an artist points to the fundamental ability of every human to be creative in the art of life with respect to the development of one s own personality and one s actions within society Beuys saw society as an artwork in a permanent process of transformation a social sculpture in which every person participated and for which everyone should be educated as comprehensively as possible Beuys describes pedagogy as central to his art This book thus examines important aspects of Beuys s art and theory and the challenges they raise for contemporary artistic education It outlines the foundational theoretical qualities of artistic education and discusses the practice of artistic projects in a series of empirical examples The author Carl Peter Buschk hle documents projects he has undertaken with various high school classes In additional chapters Mario Urla discusses the great value of artistic projects in primary school and Christian Wagner reflects on his collaboration with the performance artist Wolfgang Sautermeister and school students in a socially disadvantaged urban area Artistic education has become one of the most influential art pedagogical concepts in German speaking countries This book presents its foundations and educational practices in English for the first time

Reflections on History and Historians Theodore S. Hamerow, 1987 History as a field of learning is in a state of crisis It has lost much of its influence in institutions of higher learning and its place in public esteem Historians have in large part lost touch with the intelligent lay reader and with the undergraduate college student History s value to society is being questioned In this work a distinguished historian views the profession to which he has been devoted for more than thirty years Theodore S Hamerow s learned observations will be welcomed by all historians and by those involved in the management of higher education and should be required reading for all graduate students in history Far from being a sentimental look at the past Hamerow s work confronts the unpleasant reality of the present History he says flatly is a discipline in retreat The profession is in serious trouble and there are no signs that its problems will be resolved in the foreseeable future After identifying the current crisis Hamerow proceeds to trace the development of the profession over the last hundred years and to examine its characteristics in modern society In this section of the book he shares some fascinating practical observations on the ways in which the profession operates Hamerow explains why some historians rise to prominence while others do not He also examines causes of the dissatisfactions that afflict many historians and their students Hamerow also examines the way in which academic historians live their lives as he expands on the daily realities that they face He then explains how those realities have shaped scholarship and led to the new history The broad use of social science methods he observes has had the effect of isolating the new historians from traditional historians indeed from one another Couched in the arcane prose of machine readable languages says Hamerow history has become inaccessible to the intelligent lay reader who had once read historical works with interest understanding and appreciation In concluding his examination Hamerow asks What is the use of history It has long been a favorite question asked by historians but seldom one

over which they agonized for very long After considering various arguments for the usefulness of historical investigation Hamerow offers his own justification There are times says Hamerow when even the most spontaneous or instructive cultural pursuits need to be examined in the light of the purposes they serve and the goals they seek Now might be a good time for all historians to take a long look at the direction their discipline has taken in the past century at the functions it has come to perform and at the serious dilemma it now faces Hamerow is a steady and helpful guide to any such examination

The Art of Religion Maarten Delbeke, 2016-04-01 Bernini and Pallavicino the artist and the Jesuit cardinal are closely related figures at the papal courts of Urban VIII and Alexander VII at which Bernini was the principal artist The analysis of Pallavicino's writings offers a new perspective on Bernini's art and artistry and allow us to understand the visual arts in papal Rome as a making manifest of the fundamental truths of faith Pallavicino's views on art and its effects differ fundamentally from the perspective developed in Bernini's biographies offering a perspective on the tension between artist and patron work and message In Pallavicino's writings the visual arts emerge as being intrinsically bound up with the very core of religion involving questions of idolatry mimesis and illusionism that would prove central to the aesthetic debates of the eighteenth century
