Religion and Innovation Donald A. Yerxa, 2015-12-17 It is often assumed that religion is the backward looking servant of tradition and the status quo utterly opposed to the new This refrain in so much of recent polemical writing has permeated the public mind and can even be found in academic publications But recent scholarship increasingly shows that this view is a gross simplification that in fact religious beliefs and practices have contributed to significant changes in human affairs political and legal social and artistic scientific and commercial This is certainly not to say that religion is always innovative But the relationship between religion and innovation is much more complex and instructive than is generally assumed Religion and Innovation includes contributions from leading historians archaeologists and social scientists who offer findings about the relationship between religion and innovation The essays collected in this volume range from discussions of

Pollock Linn, 1896 **Asian Religions, Technology and Science** István Keul, 2015-03-27 Over the past five decades the field of religion and science scholarship has experienced a considerable expansion This volume explores the historical and contemporary perspectives of the relationship between religion technology and science with a focus on South and East Asia These three areas are not seen as monolithic entities but as discursive fields embedded in dynamic processes of cultural exchange and transformation Bridging these arenas of knowledge and practice traditionally seen as distinct and disconnected the book reflects on the ways of exploring the various dimensions of their interconnection Through its various chapters the collection provides an examination of the use of modern scientific concepts in the theologies of new religious organizations and challenges the traditional notions of space by Western scientific conceptions in the 19th century It looks at the synthesis of ritual elements and medical treatment in China and India and at new funeral practices in Japan It discusses the intersections between contemporary Western Buddhism modern technology and global culture and goes on to
