**Reflection High-Energy Electron Diffraction and Reflection Electron Imaging of Surfaces**  
P.K. Larsen,P.J. Dobson,2012-12-06 This volume contains the papers presented at the NATO Advanced Research Workshop in Reflection High Energy Electron Diffraction and Reflection Electron Imaging of Surfaces held at the Koningshof conference center Veldhoven the Netherlands June 15 19 1987 The main topics of the workshop Reflection High Energy Electron Diffraction RHEED and Reflection Electron Microscopy REM have a common basis in the diffraction processes which high energy electrons undergo when they interact with solid surfaces at grazing angles However while REM is a new technique developed on the basis of recent advances in transmission electron microscopy RHEED is an old method in surface crystallography going back to the discovery of electron diffraction in 1927 by Davisson and Germer Until the development of ultra high vacuum techniques in the 1960 s made instruments using slow electrons more accessible RHEED was the dominating electron diffraction technique Since then and until recently the method of Low Energy Electron Diffraction LEED largely surpassed RHEED in popularity in surface studies The two methods are closely related of course each with its own specific advantages The grazing angle geometry of RHEED has now become a very useful feature because this makes it ideally suited for combination with the thin growth technique of Molecular Beam Epitaxy MBE This combination allows in situ studies of freshly grown and even growing surfaces opening up new areas of research of both fundamental and technological importance

the wrong direction or to a destructive destination Through Laufer's interpretive lenses these ancient stories come alive to inform and inspire our leadership today and offer us direction for the future Nathan Laufer helps us see the stories of the Bible in new ways he turns them into universal paradigms that relate to situations we all face every day and he distills his insights into practical and powerful guidelines There is no algorithm for leadership no cookbook recipe but it is hard to imagine a leader at any level of an enterprise whose capabilities will not be enhanced by studying this book from the Preface by Dr Michael Hammer
