It takes into account changes in science education since the first edition was published including more recent curriculum reform. This new edition builds upon the success of its predecessor introducing new material on the use of ICT in science teaching as well as providing sound, informative and useful discussion on managing your professional development, knowledge, concepts and principles of science, planning for learning and teaching in science, practical teaching strategies, selecting and using resources, assessment and examinations and the broader science curriculum. Midwest *Current Researches in Educational Sciences IV* Fatih Ünal BOZDAĞ, Ömer Tuğrul KARA, 2022-04-06. **Reflective Teaching In The Postmodern World** Parker, Stuart, 1997-03-01. A well written and stimulating excursion into postmodern education. Parker's challenge to critical educational theory can in the long run only help the left rethink and deepen its political project. Peter McLaren, University of California, Los Angeles. This is a book about two stories of education. In one story there is a vocabulary of means, efficiency, bureaucracy, inspection and science; in the other one of autonomy, democracy, emancipation and action research. One is the story of positivist, managerialist approaches to education; the other is the story of reflective teaching. This book displaces both of these stories. By applying the techniques of deconstruction, Stuart Parker overturns the assumptions common to both of these positions and in doing so jettisons some widely cherished beliefs about education, autonomy and rationality. Moving beyond current debates, this book articulates a new manifesto for education in postmodernity and highlights the implications.
