Competition over Content Hilde De Weerd, 2020-03-23 Between the sixth and twentieth centuries the civil service examinations created and maintained political coherence across the Chinese polity Preparation for the examinations transformed the lives of literate elites by defining educational standards and disseminating a language that determined elite status However as participation in the examinations became central to that status an intense competition to determine the educational curriculum and the subject matter of the examinations erupted between intellectual and political rivals The principal goal of this book is to explain the restructuring of the examination field during a critical point in its history the Southern Song dynasty 1127 1279 which witnessed the increasing domination of the examinations by the Neo Confucian Learning of the Way movement By analyzing textbooks examination questions and essays and official and private commentary Hilde De Weerd examines how occupational political and intellectual groups shaped curricular standards and examination criteria and how examination standards in turn shaped political and intellectual agendas These questions reframe the debate about the civil service examinations and their place in the imperial order

The Decline of the Western-Centric World and the Emerging New Global Order Yun-han Chu, Yongnian Zheng, 2020-11-24 The Western liberal democratic world order which seemingly triumphed following the collapse of communism is looking increasingly fragile as populists and nationalists take power in the United States Europe and elsewhere as the momentum of democratization in developing countries stalls and as Western liberal establishments fail to deal with economic stagnation worsening political polarization social inequality and migrant crises At the same time there is a shift of economic power from the West towards Asia This book explores these critical developments and their consequences for the world order It considers how far the loss of the West s power to dominate the

world order together with the relative decline of US power and its abdication of its global leadership role will lead to more conflict disorder and chaos and how far non Western actors including China India and the Muslim world are capable of establishing visionary policy initiatives which reconfigure the paths and rules of economic integration and globalization and the mechanisms of global governance The book also assesses the sustainability of the economic rise of China and other non Western actors explores the Western liberal democratic order s capacity for resilience and discusses how far the outlook is pessimistic or optimistic

The East Asian Challenge for Democracy Daniel A. Bell,Chenyang Li,2013-08-12 The rise of China along with problems of governance in democratic countries has reinvigorated the theory of political meritocracy But what is the theory of political meritocracy and how can it set standards for evaluating political progress and regress To help answer these questions this volume gathers a series of commissioned research papers from an interdisciplinary group of leading philosophers historians and social scientists The result is the first book in decades to examine the rise or revival of political meritocracy and what it will mean for political developments in China and the rest of the world Despite its limitations meritocracy has contributed much to human flourishing in East Asia and beyond and will continue to do so in the future This book is essential reading for those who wish to further the debate and perhaps even help to implement desirable forms of political change
