meticulous historical and empirical account of the transformations of some key Latin American countries First it is at the frontier of a research agenda initiated back to the end of the 1970s second it clearly distinguishes between an ideal type approach and the complexity of any specific national configuration and its transformation in history Furthermore the author provides decisive arguments against a pure economic determinism too frequently supposed to govern institutions building and reforms Last but not least the book culminates by an impressive analysis of the crises that quite any Latin America society experiences at the end the 2010s Robert Boyer Institut des Am riches Paris France This book defends the idea that there are significant structural and institutional differences between the countries in Latin America Building off the results of a four year research project Bizberg argues against the idea that in Latin America there is one single type of capitalism a hierarchical one that is entangled in a vicious cycle Rather there are clusters of countries that have had similar historical trajectories analogous structures or comparable reactions to changes to the world economy but have not all followed the same mode of development Just as analysts have found a variety of capitalisms in developed countries it is possible to identify the emergence of different types of capitalism in Latin America since the 1980s debt crisis These varieties of capitalism are defined according to categories including the articulation to the world economy the role of the State the structure of the political system and the action of civil society which give rise to distinct wage relations comprising the industrial relations system and the welfare regime

Poder y política en América Latina Teresa Castro Escudero, Lucio Oliver Costilla, 2005

En este libro se investiga y discute el poder en la América Latina de hoy. El menor peso del poder y la disminución de la política bajo las reformas tecnocráticas neoliberales del Estado son sólo una apariencia. En realidad ambos siguen siendo sostén de las instituciones y fundamento de la reproducción actual de la economía y la sociedad. Sin embargo es del interés de los círculos dominantes internos y externos de la actual mundialización que aparezcan diluidos y escondidos. De ahí que este tomo busque sacarlos a la luz pública y debatir los cambios en su carácter y en sus funciones.
