Reforming Social Security For Ourselves And Our Posterity:

Reforming Social Security Charles P. Blahous, 2000-08-30 Blahous contends that Social Security is ill equipped to withstand the effects of an aging population and will impose excessive tax burdens upon future Americans unless its course is changed Far from a doomsday tract however the book provides instances of proposals that would satisfactorily avert this course if only the political will is mustered to implement them Blahous argues for the program developed by the National Commission on Retirement Policy but also offers positive descriptions of plausible alternatives as well as unsparing criticism of those who would cook the books in defense of either current law or high cost alternatives Reforming Social Security is sure to disturb ideologues from all parts of the political spectrum because of its frank willingness to expose the costs of different approaches as well as the self interest so often pursued by interest groups political actors and Social Security experts An important analysis for the general public as well as policy makers and others concerned with social security issues

Rethinking Pension Reform Franco Modigliani, Arun Muralidhar, 2004-08-02 This book is unique as it presents an academic and a practical aspect on managing pension funds to clarify the global debate on social security The authors establish the basic choices in designating any system to help policy makers develop the system that achieves their many objectives The success of reforms depends on financial innovation to mitigate key risks and some innovations are discussed which also demonstrates how pension reform choices affect the achievement of retirement objectives Finally the authors examine some proposed hybrid options to show how the beneficial features of these hybrids can be captured through good design in a single fund

International Perspectives on Social Security Reform Rudolph Gerhard Penner, 2007 Papers from a February 24 2006 conference held by the Urban Institute to examine social security reform in six OECD countries

Social Security and Its Discontents Michael D. Tanner, 2004-02-25 Social Security is the largest government program in the world But it is also a deeply troubled one on the verge of financial collapse Within 15 years Social Security will begin running a deficit Overall the program is more than 26 trillion in debt Without fundamental reform it will not be able to pay the benefits it has promised to our children and grandchildren That has prompted the most far reaching discussion of the purpose and structure of Social Security since the program was enacted in 1935 Not so very long ago Social Security was rightly regarded as the third rail of American politics touch it and your career dies But no longer Polls today show that the vast majority of Americans support proposals that would allow younger workers to privately invest at least part of their Social Security taxes through individual accounts For more than 25 years the Cato Institute has led the debate for Social Security reform arguing that the program is fundamentally flawed and calling for greater freedom and choice for working Americans Social Security and Its Discontents represents the best of Cato's publications on the issue It includes essays by the nation's top economists and Social Security experts discussing Social Security's finances the urgent need for reform how the program treats women minorities and low income workers and the options for reform Edited by Michael D Tanner this collection is

essential reading for anyone who cares about what kind of country we will leave to our children and grandchildren
