Sotnikov, 2000. Agriculture remains the main source of employment and livelihood for the large rural population of many transition countries, especially among the former Soviet republics. Accordingly, the World Bank continuously monitors the progress of land reform and farm restructuring in the region because of the potential impact of these processes on rural development and poverty alleviation in rural areas. The present study on Belarus is the latest addition to a long and growing series of World Bank publications on land reform and farm restructuring in the former socialist countries of Europe and Central Asia. The unique features of all these publications is their reliance on first-hand empirical information collected through extensive farm surveys of various rural constituencies. Analysis of survey findings enables the World Bank to base its policy dialogue with governments in the region on solid empirical facts, making the Bank's recommendations more credible and relevant. The survey findings in this volume will provide a platform for useful policy discussions with this country's government and supply international donors that are active there with essential information to design their strategic programs. DeMISTifying MIS Luc Lecuit, 1999-01-01. Managers are often far from the real action, so they need something that will tell them what is going on. Luckily, the rapid evolution of tools for collecting, analyzing, and diffusing information has greatly improved our ability to manage from a distance. However, the speed of technological change means that changes in management practices and tools are inescapable. Development of Management Information Systems (MIS) for social funds has become essential due to some of the characteristics unique to these types of projects or organizations. Among these unique characteristics are the need for transparency and efficiency because of the highly visible nature of the activities. These guidelines define MIS and underscore its importance. They also outline specific tools to assist in selection of an MIS and summarize its design and implementation. These guidelines are meant to be a practical tool to help those who are setting up or managing a social fund navigate in MIS waters. Technical jargon is kept to a minimum, and a glossary of technical terms is provided to assist readers who do not have a technical background. However, special Technical Boxes have been included for the experts in this field.
