Catalog National Institute of Standards and Technology (U.S.),1975 Learning Directory ,1970 **Energy Saving Coating Materials** Goutam Kumar Dalapati,Mohit Sharma,2020-05-14 Energy Saving Coating Materials Design Process Implementation and Developments provides comprehensive information regarding recent materials advancements and design aspects and integration for infra red radiation regulators along with future developments of zero emission buildings The key opportunities and challenges for the usage of existing heat regulation materials and their implementation for commercial aspects are explored The fundamental interaction between electromagnetic waves and materials are discussed along with materials synthesis design and integration of coatings for smart window applications This book presents recent developments of innovative technologies comprising energy saving materials and coatings which are key considerations for achieving vital energy saving milestones Provides knowledge based information on the optical properties of materials and their utility for solar energy harvesting and energy saving applications Discusses innovative coatings for smart windows applications including the progressive development of radiative cooling and cool paint Previews future developments for the synthesis design and integration of heat regulative materials Resources in Vocational Education ,1977 **Ozone Connections** Penelope Canan,Nancy Reichman,2017-09-08 It is difficult to think of a more significant example of international cooperation to address a problem that threatened the health and wellbeing of the entire planet than the 1987 Montreal Protocol for the Elimination of Ozone Depleting Substances This breakthrough in international environmental governance has proved to be an extraordinary success beyond rhetoric or promises In a dozen years this international agreement went from an understanding of the need to act in a precautionary manner for mutual benefit to a successful worldwide effort to eliminate chemical substances harmful to our protective ozone layer The production and consumption of most ozone depleting substances has now been phased out in developed countries with developing countries not far behind What happened and why is of tremendous importance for those looking for guidance in the future particularly those now involved in hugely complicated negotiations on climate change The success of the Montreal Protocol has been linked to many factors such as political will treaty flexibility and the recognition of equity issues raised by developing countries While comprehensively analysing all of these success factors Ozone Connections goes on to suggest that a social organization of global governance as typified by the protocol s Technical and Economic Assessment Panel TEAP was a unique but replicable decisive factor The book argues that we need to understand how the implementation of complex global environmental agreements depends on the construction and exploitation of social connections among experts who act collectively to define solutions to environmental problems This highly original and provoking thesis synthesises some of the more exciting social science concepts and methods while

refining our basic understanding of environmental social change and providing policy makers with concrete success factors to replicate This book will be essential reading for academics in the fields of sociology political science international relations network studies human communication motivation collaboration and leadership as well as the burgeoning interdisciplinary field of environmental studies Businesses will also find many applications for practical use Finally the many directly transferable lessons from ozone layer protection make this book a key addition to the growing literature on climate change

Mahieu,2008-06-24 The most straightforward method to change the surface properties of a material is to deposit a thin film or coating on it Hence it is not surprising that an overwhelming amount of scientific and technical papers is published each year on this topic Sputter deposition is one of the many so called physical vapour deposition PVD techniques In most cases sputter deposition uses a magnetically enhanced glow discharge or magnetron discharge to produce the ions which bombard and sputter the cathode material In the first chapter of this book Chap 1 the details of the sputter process are discussed Essential to sustain the discharge is the electron emission during ion bombardment Indeed the emitted electrons are accelerated from the target and can ionize gas atoms The formed ions bombard again the target completing the sustaining process A complete chapter is assigned to this process to highlight its importance Chap 2 Although the sustaining process can be described quite straightforward a complete understanding of the magnetron discharge and the influence of different parameters on the discharge characteristics is only possible by modelling see Chap 3 With these three chapters the reader should be able to form an

idea of the target and plasma processes occurring during a DC magnetron discharge
