Regaining Competitiveness Putting The Goal To Work:

Regaining Competitiveness Mokshagundam L. Srikanth, Harold E. Cavallaro, 1987 **Regaining Competitiveness** Srikanth, 1995-06-01 *The World of the Theory of Constraints* Victoria J Mabin, Steven J Balderstone, 2020-04-27

The Theory of Constraints TOC as developed by Dr Eliyahu Goldratt has seen a rapid expansion since the publication of his book *The Goal*. As with most fast growing areas you can quickly feel out of touch with new developments. *The World of the Theory of Constraints* provides a summary of recently published research on TOC. The authors explored databases and sought out papers and books drawing on as wide a range as possible. Aside from the works by Dr Goldratt himself the authors focus on items published since 1990 highlighting the most recent developments in TOC. The scope of the material covers works containing specific reference to TOC including Synchronous Manufacturing and Constraint Management. The book is organized into three sections. The first section contains an analysis and interpretation of the results of the search. The second provides abstracts on all the material. The third supplies author keyword and subject indexes along with a list of books, journals, websites and publishers. Extensively researched and referenced, *The World of the Theory of Constraints* furnishes comprehensive material on TOC. The multi search approach has made this arguably the most exhaustive bibliography on this subject available. If you are researching TOC this is the best place to start. If you use or teach TOC you will want this resource.

Features **Regaining Competitiveness** Mokshagundam L. Srikanth, Harold E. Cavallaro, 1993 *Manufacturing at Warp Speed* Eli Schragenheim, H William Dettmer, 2000-09-28

Manufacturing systems don't exist in a vacuum isolated from the rest of the company but they are often managed that way. A truly effective highly competitive manufacturing company integrates its manufacturing, marketing, sales, purchasing and financial functions into a well coordinated whole. *Manufacturing at Warp Speed* Optimizing Supply Chain Financial Performance explains in detail how to coordinate all these functions to maximize sales revenue while controlling inventory and overhead costs. Ultimately the effects of applying the new Simplified Drum Buffer Rope (DBR II) introduced by the authors include dramatically faster manufacturing cycle times, shorter order to delivery lead times, higher on time delivery reliability and better customer satisfaction. The book gives you everything a typical production professional needs to implement this new DBR approach. A supplemental feature, the Management Interactive Case Study Simulator (MICSS), is included with the book. Available for download via the CRC Press website, the simulator sets up a virtual company where you can test and practice the processes you learn in the book before implementing them in your organization. The book and software together constitute the complete package for learning how to streamline manufacturing operations. The first book available on second generation Drum Buffer Rope Manufacturing, *Manufacturing at Warp Speed* Optimizing Supply Chain Financial Performance describes the simplest, most efficient methods for reducing manufacturing cycle time and increasing the speed of manufacturing yet devised. Fully illustrated with numerous examples, case studies and manufacturing scenarios, the book is so easy to read that even the novice can understand it. Correct use of this new method practically
