Pet Food Politics Marion Nestle,2008-09-15 Marion Nestle acclaimed author of Food Politics now tells the gripping story of how in early 2007 a few telephone calls about sick cats set off the largest recall of consumer products in U S history and an international crisis over the safety of imported goods ranging from food to toothpaste tires and toys Nestle follows the trail of tainted pet food ingredients back to their source in China and along the supply chain to their introduction into feed for pigs chickens and fish in the United States Canada and other countries throughout the world What begins as a problem merely for cats and dogs soon becomes an issue of tremendous concern to everyone Nestle uncovers unexpected connections among the food supplies for pets farm animals and people and identifies glaring gaps in the global oversight of food safety

The End of Food Paul Roberts,2009 Roberts investigates the modern food system and presents a startling truth how manufacturers make market

and transport food is no longer compatible with the billions of consumers the system was built to serve Nutrition in Public Health Arlene Spark,2007-05-11 Nutrition plays a key role in many areas of public health such as pre term delivery cancer obesity diabetes and cardiovascular and renal diseases Government nutrition policy therefore bears a huge influence on the nation s biggest health concerns There is a clear need for information on this topic that unarguably holds the key to the primar **The Media, the Public and Agricultural Biotechnology** Dominique Brossard,James Shanahan,T. Clint Nesbitt,2007 Bringing together the perspectives of both researchers and practitioners on public opinion processes these case studies look at public opinion data communication theory and international examples to see how public opinion is formed Empirical tests of theories of opinion formation are studied as well as practical experiences used to provide critical insights on communication strategies **Food Law for Public Health** Jennifer L. Pomeranz,2016 Food and its many aspects production consumption marketing labeling procurement safety have become a mainstay of both popular discourse and the practice of public health Food Law for Public Health is the first book on food law written specifically for a public health audience It offers necessary grounding in food law for audiences in public health nutrition food studies policy or anyone with a professional interest in this increasingly important area With clear writing and thought provoking questions and exercises for classroom discussion it is an ideal tool for learning and teaching *Food Fight* McKay Jenkins,2018-02-13 Are GMOs really that bad A prominent environmental journalist takes a fresh look at what they actually mean for our food system and for us In the past two decades GMOs have come to dominate the American diet Advocates hail them as the future of food an enhanced method of crop breeding that can help feed an ever increasing global population and adapt to a rapidly changing environment Critics meanwhile call for their banishment insisting GMOs were designed by overeager scientists and greedy corporations to bolster an industrial food system that forces us to rely on cheap unhealthy processed food so they can turn an easy profit In response health conscious brands such as Trader Joe s and Whole Foods have started boasting that they are GMO free and companies like Monsanto have become villains in the eyes of average consumers Where can we turn for the truth Are GMOs an astounding scientific breakthrough destined to end world hunger Or are they simply a way for giant companies to control a problematic food system Environmental writer McKay Jenkins traveled across the country to answer these questions and discovered that the GMO controversy is more complicated than meets the eye He interviewed dozens of people on all sides of the debate scientists hoping to engineer new crops that could provide nutrients to people in the developing world Hawaiian papaya farmers who credit GMOs with saving their livelihoods and local farmers in Maryland who are redefining what it means to be sustainable The result is a comprehensive nuanced examination of the state of our food system and a much needed guide for consumers to help them make more informed choices about what to eat for their next meal *Eating History* Andrew F. Smith,2009-09-18 Food expert and celebrated food historian Andrew F Smith recounts in delicious detail the creation of contemporary American cuisine The diet of the modern American wasn t always as corporate

conglomerated and corn rich as it is today and the style of American cooking along with the ingredients that compose it has never been fixed With a cast of characters including bold inventors savvy restaurateurs ruthless advertisers mad scientists adventurous entrepreneurs celebrity chefs and relentless health nuts Smith pins down the truly crackerjack history behind the way America eats Smith s story opens with early America an agriculturally independent nation where most citizens grew and consumed their own food Over the next two hundred years however Americans would cultivate an entirely different approach to crops and consumption Advances in food processing transportation regulation nutrition and science introduced highly complex and mechanized methods of production The proliferation of cookbooks cooking shows and professionally designed kitchens made meals more commercially politically and culturally potent To better understand these trends Smith delves deeply and humorously into their creation Ultimately he shows how by revisiting this history we can reclaim the independent locally sustainable roots of American food
