Spronk, Thomas Hendriks, 2020-02-04 Images and stories about African sexuality abound in today's globalized media. Frequently old stereotypes and popular opinion inform these stories and sex in the media is predominately approached as a problem in need of solutions and intervention. The authors gathered here refuse an easy characterization of African sexuality and instead seek to understand the various erotic realities, sexual practices and gendered changes taking place across the continent. They present a nuanced and comprehensive overview of the field of sex and sexuality in Africa to serve as a guide through the quickly expanding literature. This collection offers a set of texts that use sexuality as a prism for studying how communities coalesce against the canvas of larger political and economic contexts and how personal lives evolve therein. Scholars working in Africa, the U.S. and Europe reflect on issues of representation, health and bio politics, same sex relationships and identity, transactional economies of sex, religion and tradition and the importance of pleasure and agency. This multidimensional reader provides a comprehensive view of sexuality from an African perspective. **Disciplinary and**

Dissent in Cultural Studies Cary Nelson, Dilip Gaonkar, 2013-10-28 First published in 1996. As recently as the early 1990s people wondered what was the future of cultural studies in the United States and what effects its increasing internationalization might have. What type of projects would cultural studies inspire people to undertake? Would established disciplines welcome its presence and adapt their practices accordingly? *Disciplinary and Dissent in Cultural Studies* answers such questions. It is now clear that while striking and innovative work is underway in many different fields, most disciplinary organizations and structures have been very resistant to cultural studies. Meanwhile, cultural studies has been subjected to repeated attacks by conservative journalists and commentators in the public sphere. Cultural studies scholars have responded not only by mounting focused critiques of the politics of knowledge but also by embracing ambitious projects of social, political and cultural commentary by transgressing all the official boundaries of knowledge in a broad quest for cultural understanding. This book tracks these debates and maps future strategies for cultural studies in academia and public life. The contributors to *Disciplinary and Dissent in Cultural Studies* include established scholars and new voices. In a series of polemic and exploratory essays written especially for this book, they track the struggle with cultural studies in disciplines like anthropology, literature and history and between cultural studies and very different domains like Native American culture and the culture of science. Contributors include Arjun Appadurai, Michael Denning, Lawrence Grossberg, Cary Nelson, Constance
