**Crime Prevention** Steven P. Lab, 2016-02-12 Crime Prevention Approaches Practices and Evaluations 9th Edition meets the needs of students and instructors for engaging evidence based impartial coverage of the origins of crime as well as of public policy that can reduce or prevent deviance The book examines a range of approaches to preventing crime and elucidates their respective goals Strategies include primary prevention measures designed to prevent conditions that foster deviance secondary prevention measures directed toward persons or conditions with a high potential for deviance and tertiary prevention measures to deal with persons who have already committed crimes This edition provides research and information on all aspects of crime prevention including the physical environment and crime neighborhood crime prevention programs community policing crime in schools and electronic monitoring and home confinement Lab offers a thorough and well rounded discussion of the

many sides of the crime prevention debate in clear and accessible language      **Metric Handbook** Pamela Buxton, 2015-03-05 Significantly updated in reference to the latest construction standards and evolving building types Many chapters revised including housing transport offices libraries and hotels New chapter on flood aware design Sustainable design integrated into chapters throughout Over 100 000 copies sold to successive generations of architects and designers this book belongs in every design studio and architecture school library The Metric Handbook is the major handbook of planning and design information for architects and architecture students Covering basic design data for all the major building types it is the ideal starting point for any project For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of As well as building types the Metric Handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements The Metric Handbook provides an invaluable resource for solving everyday design and planning problems      **Towns and Cities: Function in Form** Julian Hart, 2016-03-09 Challenging existing assumptions about how our towns and cities are structured and formed Julian Hart provides an engaging and thought provoking alternative theory of urban design This is not urban design in the sense of the practice of design rather it is a theory of the form of the town at all scales why towns and cities happen to be structured the way they are as a result of the social political legal and especially economic forces that create them The shape of the city at every scale from the internal configuration of dwellings all the way up to the superstructure of the whole city can be seen to arise from the interplay between three antagonistic socio economic tensions In going about our daily business and in championing particular political objectives we collectively fashion our cities in terms of their structure and form This leads to various new ways of understanding how and why our cities so happen to be configured the way they are The book makes a step change from any other comparable studies by understanding our towns and cities in terms of function in form This helps us to appreciate why every town is a recognisable town wherever it is Different urban environments in different parts of the world past and present can come to be seen according to their similarities instead of their differences Furthermore by appreciating how the economic influences of everyday life structure our towns and cities we can in turn begin to understand better how the shape of towns and cities affects the quality of life of inhabitants and the cohesiveness of communities In covering all scales from inside the home to macrostructure of the city the book encapsulates urban design through to town planning and does not seek to distinguish between the various design disciplines

Affordability and the Supply of Housing Great Britain: Parliament: House of Commons: ODPM: Housing, Planning, Local Government and the Regions Committee, 2006-03-20 Affordability and the supply of Housing Session 2005 06 Vol 2 Oral and written Evidence      **Environmental Criminology and Crime Analysis** Richard Wortley, Michael Townsley, 2016-11-01 Environmental criminology is a term that encompasses a range of overlapping perspectives At its core the many strands of

environmental criminology are bound by a common focus on the role that the immediate environment plays in the performance of crime and a conviction that careful analyses of these environmental influences are the key to the effective investigation control and prevention of crime This new edition brings together leading theorists and practitioners in the field to provide a comprehensive integrative coverage of the field of environmental criminology and crime analysis This book is divided into three sequential parts Understanding the crime event explores routine activity approach crime pattern theory the rational choice perspective and situational precipitators of crime Analysing crime patterns discusses crime mapping offender mobility repeat victimisation geographic profiling and crime scripts Preventing and controlling crime covers topics including problem oriented policing situational crime prevention and environmental design Fully updated and including new chapters on crime scripts and offender mobility a scene setting introductory overview and critical thinking questions at the end of each chapter this text is an essential and comprehensive resource for practitioners and students taking courses on environmental criminology crime analysis and crime prevention

**Planning the Night-time City** Marion Roberts, Adam Eldridge, 2012-11-12 The night time economy represents a particular challenge for planners and town centre managers In the context of liberalised licensing and a growing culture around the 24 hour city the desire to foster economic growth and to achieve urban regeneration has been set on a collision course with the need to maintain social order Roberts and Eldridge draw on extensive case study research undertaken in the UK and internationally to explain how changing approaches to evening and night time activities have been conceptualised in planning practice The first to synthesise recent debates on law health planning and policy this research considers how these dialogues impact upon the design management development and the experience of the night time city This is incisive and highly topical reading for postgraduates academics and reflective practitioners in Planning Urban Design and Urban Regeneration

**The Routledge Handbook of Place** Tim Edensor, Ares Kalandides, Uma Kothari, 2020-05-26 The handbook presents a compendium of the diverse and growing approaches to place from leading authors as well as less widely known scholars providing a comprehensive yet cutting edge overview of theories concepts and creative engagements with place that resonate with contemporary concerns and debates The volume moves away from purely western based conceptions and discussions about place to include perspectives from across the world It includes an introductory chapter which outlines key definitions draws out influential historical and contemporary approaches to the theorisation of place and sketches out the structure of the book explaining the logic of the seven clearly themed sections Each section begins with a short introductory essay that provides identifying key ideas and contextualises the essays that follow The original and distinctive contributions from both new and leading authorities from across the discipline provide a wide rich and comprehensive collection that chimes with current critical thinking in geography The book captures the dynamism and multiplicity of current geographical thinking about place by including both state of the art in depth critical overviews of theoretical approaches to place and new explorations and cases that chart a

framework for future research It charts the multiple ways in which place might be conceived situated and practised This unique comprehensive and rich collection will be an essential resource for undergraduate and graduate teaching for experienced academics across a wide range of disciplines and for policymakers and place marketers It will provide an invaluable and up to date guide to current thinking across the range of disciplines such as Geography Sociology and Politics and interdisciplinary fields such as Urban Studies Environmental Studies and Planning
