Safety Nature Growing Up Safe:

Growing Up with a Soul Full of Nature Tim Corcoran, Jean Sage, 2011-02 This book tells the incredible story of a boy growing into a man with Nature as his life's foundation and teacher. This book will inspire the reader to bring Nature back to our children as a foundation in their lives. As we move into the future and the attack on Nature continues from humankind, children being raised today will need a deep connection to the natural world in order to help heal nature plus find stability and inspiration for their own lives. After all, Nature is an amazing teacher and constant friend; it just takes knowing how to listen and communicate to the Earth and the teachings come flooding in. As Tim Corcoran always says, "Get out in the woods. It's the best place to be." This book is a must-read for parents and children alike. It will change your life. Tim Corcoran's Irish heritage, as taught to him by his uncle and grandfather, has linked him deeply to Earth people's philosophy of life. He first went to the woods at age six. He knew then that it was his home. At seventeen, he spent four months alone in the Canadian Wilderness practicing Earth living skills. Tim began a career teaching wildlife conservation in 1974. During this time, he learned how to communicate with the spirits of the animals he worked with, enhancing his abilities to connect on an intimate level with them. He has an extensive background in working with wildlife. He has worked at the Alberta Game Farm in Alberta, Canada, as an animal caretaker, the Crandon Park Zoo in Miami, Florida, as an animal relocation director, and Marine World Africa U.S.A. as a chimp and elephant trainer. Tim co-founded the Native Animal Rescue in Santa Cruz, California, rescuing and releasing injured wildlife. He also took that opportunity to speak at schools to educate hundreds of children on wildlife conservation.

Public Space and the Culture of Childhood Gill Valentine, 2017-03-02 Children are at the heart of popular and public debates in North America and Europe about the culture of public space. On the one hand, there is increased anxiety about children's vulnerability to stranger danger; on the other, there is a rising tide of fear about out-of-control and dangerous youth. This book addresses both these debates about children's role in public space, setting them within an academic framework and drawing on a range of interdisciplinary work on childhood, young people, and parenting. It is therefore relevant to practitioners and policy makers concerned with the nature and future of public space and to academics researching or teaching about childhood, family, or public space in the disciplines of sociology, social policy, and geography.

A Friend to Nature Laura Knowles, 2021-08-03 This is my pledge, my promise, my vow. Lasting forever, starting now, I'll be a friend to nature. An illustrated book celebrating the natural world and ways to appreciate it, filled with practical activities and ideas to help wildlife and the environment on your doorstep and worldwide. Starting with a pledge in poetic form, this book is a call to arms for the next generation of peaceful eco-warriors. Broken down into sections of activities, each lyrically relates back to the metaphor of being a friend to nature. The activities themselves are short, easy, and fun, with a few more extensive projects mixed in. These are interspersed with nature quotes, poetry, and other thought-provoking musings, as well as pieces of simple non-fiction information such as the life cycle of a frog, a butterfly, a cross-section of a flowering plant, and why

you should always wish on a dandelion clock The final section explores what nature can give back to us in turn that if we look after the natural world we will always have a friend in nature a space to be calm to pause and think to recharge to bring us joy amusement and health

Transnational Migration and Childhood Naomi Tyrrell, Allen White, Caitriona Ni Laoire, Fina Carpena Mendez, 2013-09-13 This book challenges the adult centric tendencies of migration research and policy which often overlooks children and young people's own experiences of migration A wide range of international contributors provide careful analysis of the situations of children in contemporary transnational migratory contexts in the Global North and South Drawing on studies with migrant children and young people in a variety of situations Transnational Migration and Childhood makes a unique contribution to furthering our understandings of transnational childhoods It explores the laws and policies that govern children and young people's experiences of transnational migration whilst foregrounding their own accounts of migration and transnationalism The book shifts our attention away from dominant discourses of migrant children as victims towards the development of broader conceptualisations of transnational migration and childhood It incorporates different migratory flows a variety of sending and receiving contexts and child centred perspectives Transnational Migration and Childhood will be of interest to researchers and policy makers working in the fields of migration asylum and childhood at local national and transnational scales This book was originally published as a special issue of the Journal of Ethnic and Migration Studies

Department of Education, 2000 Food Safety after Fukushima Nicolas Sternsdorff-Cisterna, 2018-10-31 The triple disaster that struck Japan in March 2011 forced people living there to confront new risks in their lives Despite the Japanese government s reassurance that radiation exposure would be small and unlikely to affect the health of the general population

many questioned the government's commitment to protecting their health. The disaster prompted them to become vigilant about limiting their risk exposure and food emerged as a key area where citizens could determine their own levels of acceptable risk. *Food Safety after Fukushima* examines the process by which notions about what is safe to eat were formulated after the nuclear meltdown. Its central argument is that as citizens informed themselves about potential risks they also became savvier in their assessment of the government's handling of the crisis. The author terms this Scientific Citizenship and he shows that the acquisition of scientific knowledge on the part of citizens resulted in a transformed relationship between individuals and the state. Groups of citizens turned to existing and newly formed organizations where food was sourced from areas far away from the nuclear accident or screened to stricter standards than those required by the state. These organizations enabled citizens to exchange information about the disaster, meet food producers and work to establish networks of trust where food they considered safe could circulate. Based on extensive fieldwork and interviews with citizens, groups, mothers' associations, farmers, government officials and retailers, *Food Safety after Fukushima* reflects on how social relations were affected by the accident. The author vividly depicts an environment where trust between food producers and consumers had been shaken, where people felt uneasy about their food choices and the consequences they might have for their children, and where farmers were forced to deal with the consequences of pollution that was not of their making. Most poignantly, the book conveys the heavy burden now attached to the name Fukushima in the popular imagination and explores efforts to resurrect it.
