Fine Chemicals Manufacture A. Cybulski,M.M. Sharma,R.A. Sheldon,J.A. Moulijn,2001-12-10 The sector of fine chemicals including pharmaceuticals agrochemicals dyes and pigments fragrances and flavours intermediates and performance chemicals is growing fast For obvious reasons chemistry is a key to the success in developing new processes for fine chemicals However as a rule chemists formulate results of their work as recipes which usually lack important information for process development Fine Chemicals Manufacture Technology and Engineering is intended to show what is needed to make the recipe more useful for process development purposes and to transform the recipe into an industrial process that will be safe environmentally friendly and profitable The goal of this book is to form a bridge between chemists and specialists of all other branches involved in the scale up of new processes or modification of existing processes with both a minimum effort and risk and maximum profit when commercializing the process New techniques for scale up and optimization of existing processes and improvements in the utilization of process equipment that have been developed in recent years are presented in the book

Recent Advances in Sustainable Process Design and Optimization Dominic C. Y. Foo,Mahmoud M. El-Halwagi,Raymond R. Tan,2012 This book is a compilation of the various recently developed techniques emphasizing better chemical processes and products with state of

the art contributions by world renowned leaders in process design and optimization It covers various areas such as grass roots design retrofitting continuous and batch processing energy efficiency separations and pollution prevention striking a balance between fundamental techniques and applications The book also contains industrial applications and will serve as a good compilation of recent industrial experience for which the process design and optimization techniques were applied to enhance sustainability Academic researchers and industrial practitioners will find this book useful as a review of systematic approaches and best practices in sustainable design and optimization of industrial processes The book is accompanied by some electronic supplements i e models and programs for selected chapters

Nonlinear Model Based Process Control R. Berber, Costas Kravaris, 2012-12-06 The ASI on Nonlinear Model Based Process Control August 10-20 1997 Antalya Turkey convened as a continuation of a previous ASI which was held in August 1994 in Antalya on Methods of Model Based Process Control in a more general context In 1994 the contributions and discussions convincingly showed that industrial process control would increasingly rely on nonlinear model based control systems Therefore the idea for organizing this ASI was motivated by the success of the first one the enthusiasm expressed by the scientific community for continuing contact and the growing incentive for on line control algorithms for nonlinear processes This is due to tighter constraints and constantly changing performance objectives that now force the processes to be operated over a wider range of conditions compared to the past and the fact that many of industrial operations are nonlinear in nature The ASI intended to review in depth and in a global way the state of the art in nonlinear model based control The list of lecturers consisted of 12 eminent scientists leading the principal developments in the area as well as industrial specialists experienced in the application of these techniques Selected out of a large number of applications there was a high quality active audience composed of 59 students from 20 countries Including family members accompanying the participants the group formed a large body of 92 persons Out of the 71 participants 11 were from industry
