Cline, 1994 A reissue of Eric H Cline s highly regarded study of trade in the Late Bronze Age Aegean first published in 1994 and out of print since 2000 The monograph is composed of three principal parts 1 an analytical section discussing the trade and contacts which occurred between the Aegean Italy Egypt and the Near East during the latter half of the second millennium BC and the social economic and cultural implications of such contacts 2 first a catalogue of literary and pictorial references to the LBA Aegean found in outside areas primarily Egypt and the Near East with transliterations and translations of the appropriate texts and second a compilation of the references to and loanwords from other areas of the Mediterranean found in the Linear B texts in the Aegean and 3 a catalogue by object type of all the Orientalia and Occidentalia found in LBA contexts within the Aegean area The monograph utilizes the catalogues in combination with previously published works by a

Keep On Sailing the Wine - Dark Sea Elizabeth Rakoczy, 2018-05-30 Today's fast changing globalised world is challenging thousands of years of received wisdom and ideas about Western society The idea of Ancient Greece as being the cradle of civilisation is increasingly being called into question not only by archaeological findings but also by younger generations As the author and her husband planned a series of sailing trips around the eastern Mediterranean their children's question Why Greece inspired the author to investigate why Ancient Greece is so important or indeed whether it is really still important at all Readers of this book are introduced to the lasting influence of Ancient Greece through stories from ancient medieval and modern times enlivened by accounts of the author's sailing adventures and are helped along with a large number of citations maps and photos This book aspires not only to entertain but also to inspire and to reflect on the ongoing impact of Ancient Greek ideas on today's world

From Bilateralism to Community Interest Ulrich Fastenrath, 2011 This festschrift dedicated to Judge Bruno Simma traces the development of international law from regulating bilateral state to state relationships towards strengthening the entire international community by protecting human security the global environment and human rights It provides both theoretical and practical insights into these sometimes conflicting goals their basis in international law and the role played by international institutions charged with upholding these values and interests The work thus examines the mechanism by which international law contributes to the realization not only of individual State interests but the interests of the international community as a whole From this vantage point it looks at the various functions that international law fulfills in the international community from law making and institution building towards adjudication and the securing of human rights Taken together the contributions to this book paints a detailed but nevertheless comprehensive picture of the realization of community interest in contemporary international law As professor and judge Bruno Simma has contributed to all of these tasks providing ground breaking theoretical work serving in the International Law Commission and in the Committee for Economic Social and Cultural Rights and finally as a judge at the International Court of Justice in The Hague The three

introductory chapters express this unity of life and work The Christian Roots of Individualism Maureen P. Heath, 2019-11-28 The modern West has made the focus on individuality individual freedom and self identity central to its self definition and these concepts have been crucially shaped by Christianity This book surveys how the birth of the Christian worldview affected the evolution of individualism in Western culture as a cultural meme Applying a biological metaphor and Richard Dawkins definition of a meme this work argues the advent of individualism was not a sudden innovation of the Renaissance or the Enlightenment but a long evolution with characteristic traits This evolution can be mapped using profiles of individuals in different historical eras who contributed to the modern notion of individualism Utilizing excerpts from original works from Augustine to Nietzsche a compelling narrative arises from the slow but steady evolution of the modern self The central argument is that Christianity with its characteristic inwardness was fundamental in the development of a sense of self as it affirmed the importance of the everyday man and everyday life Deep Agroecology and the Homeric Epics John W. Head, 2020-12-15 Drawing on the Homeric epics this multidisciplinary work reveals the cultural transformations which need to take place in order to transition from today's modern extractive agricultural system to a sustainable natural systems agriculture In order to provide an imaginative foundation on which to build such a cultural transformation the author draws on the oldest and most pervasive pair of literary works in the Western canon the Iliad and the Odyssey He uses themes from those foundational literary works to critique the concept of state sovereignty and to explain how innovative federalism structures around the world already show momentum building toward changes in global environmental governance The book proposes a dramatic expansion on those innovations to create eco states responsible for agroecological management Drawing from many years of experience in international institutions the author proposes a system of coordination by which an international agroecology focused organization would simultaneously i avoid the shortcomings of the world's current family of powerful global institutions and ii help create and implement a reformed system of local landscape based agriculture wholly consistent with ecological principles Acknowledging the difficulty of achieving reforms such as these the author suggests that a new cultural conceptual narrative can be constructed drawing on values set forth 2 700 years ago in the Homeric epics He explains how these values can be reimagined to drive forward our efforts in addressing today's the climate and agricultural crises in ways that reflect not reject the natural processes and relationships that make the Earth a living planet This book will be of great interest to students academics and policymakers addressing issues of agrarian values environmental and agricultural law environmental restoration agroecology and global institutional reform The Role of the Physical Environment in Ancient Greek Seafaring Jamie Morton, 2017-09-18 In this study of the world of ancient Greek mariners the relationship between the natural environment and the techniques and technology of seafaring is focused upon An initial description of the geology oceanography and meteorology of Greece and the Mediterranean is followed by discussion of the resulting sailing conditions such as physical hazards sea conditions winds

and availability of shelter and environmental factors in sailing routes sailing directions and navigational techniques Appendices discuss winter and night sailing ship design weather prediction and related areas of socio maritime life such as settlement religion and warfare Wide ranging sources and illustrations are used to demonstrate both how the environment shaped many of the problems and constraints of seafaring and also that Greek mariners understanding of the environment was instrumental in their development of a highly successful seafaring tradition *Negotiating Identity in the Ancient Mediterranean* Denise Demetriou, 2012-11-22 Explores the creation of identities through cross cultural interactions in multiethnic commercial settlements in the Archaic and Classical Mediterranean **The Ancient Greek Economy** Edward M. NATIONAL BESTSELLER A book in the best tradition of popular history the untold story of Ireland s role in maintaining Western culture while the Dark Ages settled on Europe The perfect St Patrick s Day gift Every year millions of Americans celebrate St Patrick s Day but they may not be aware of how great an influence St Patrick was on the subsequent history of civilization Not only did he bring Christianity to Ireland he instilled a sense of literacy and learning that would create the conditions that allowed Ireland to become the isle of saints and scholars and thus preserve Western culture while Europe was being overrun by barbarians In this entertaining and compelling narrative Thomas Cahill tells the story of how Europe evolved from the classical age of Rome to the medieval era Without Ireland the transition could not have taken place Not only did Irish monks and scribes maintain the very record of Western civilization copying manuscripts of Greek and Latin writers both pagan and Christian while libraries and learning on the continent were forever lost they brought their uniquely Irish world view to the task As Cahill delightfully illustrates so much of the liveliness we associate with medieval culture has its roots in Ireland When the seeds of culture were replanted on the European continent it was from Ireland that they were germinated In the tradition of Barbara Tuchman s A Distant Mirror How The Irish Saved Civilization reconstructs an era that few know about but which is central to understanding our past and our cultural heritage But it conveys its knowledge with a winking wit that aptly captures the sensibility of the unsung Irish who relaunched civilization **The Mediterranean**
