Saints' Cults in the Celtic World Steven Boardman, John Reuben Davies, Eila Williamson, 2009 Saints cults flourished in the medieval world and the phenomenon is examined here in a series of studies The way in which saints cults operated across and beyond political ethnic and linguistic boundaries in the medieval British Isles and Ireland from the sixth to the sixteenth centuries is the subject of this book In a series of case studies the contributions highlight the factors that allowed particular cults to prosper in or that made them relevant to a variety of cultural contexts The collection has a particular emphasis on northern Britain and the role of devotional interests in connecting or shaping a number of polities and cultural identities Pictish Scottish Northumbrian Irish Welsh and English in a world of fluid political and territorial boundaries Although the bulk of the studies are concerned with the significance of cults in the insular context many of the articles also touch on the development of pan European devotions such as the cults of St Brendan The Three Kings or St George Contributors James E Fraser Thomas Owen Clancy Fiona Edmonds John Reuben Davies Karen Jankulak Sally Crumplin Joanna Huntington Steve Boardman Eila Williamson Jonathan Wooding

Vera Lex Historiae? Catalin Taranu, Michael J. Kelly, 2022 Writing circa 731 CE Bede professes in the introduction to his *Historia Ecclesiastica Gentis Anglorum* that he will write his account of the past of the English following only vera lex historiae Whether explicitly or most often implicitly historians narrate the past according to a conception of what constitutes historical truth that emerges in the use of narrative strategies of certain formulae or textual forms in establishing one's own ideological authority or that of one's informants in faithfulness to a cultural narrative or poetic tradition If we extend the scope of what we understand by history especially in a pre-modern setting to include not just the writings of historians legitimated by their belonging to the Latinate matrix of christianized classical history writing but also collective narratives practices rituals oral poetry liturgy artistic representations and acts of identity all re-enacting the past as or as representation of the present we find a plethora of modes of constructions of historical truth narrative authority and reliability Vera Lex Historiae will be constituted by contributions that reveal the variety of eventual strategies by which historical truth was constructed in late antiquity and the earlier Middle Ages and the range of procedures by which such narratives were established first as being historical and then as true histories This is not only a matter of narrative strategies but also habitus ways of living and acting in the world that feed on and back into the commemoration and re-enactment of the past by communities and by individuals In doing this we hope to recover something of the plurality of modes of preserving and reenacting the past available in late antiquity and the earlier middle ages which we pass by because of preconceived notions of what constitutes history writing **Hexhamshire** Allen B. Bede and the End of Time Peter Darby, 2016-04-15 Bede c. 673-735 was the leading intellectual figure of the Anglo-Saxon Church and his writings had a profound influence on the development of English Christian thought. Among the many issues he wrote about eschatology, the study of the day of judgment and the end of time was a recurring theme. Whilst recent research has furthered our knowledge of this subject in the later Middle Ages, Dr Darby's book provides the first comprehensive analysis of Bede's eschatological thought and its impact upon the Anglo-Saxon period. Taking account of Bede's beliefs about the end of time, this book offers sophisticated insights into his life, his works and the role that eschatological thought played in Anglo-Saxon society. Close attention is given to the historical setting of each source text consulted and original insights are advanced regarding the chronological sequence of Bede's writings. The book reveals that Bede's ideas about time changed over the course of his career and it shows how Bede established himself as the foremost expert in eschatology of his age. The eight chapters of this book are organised into three main thematic groups: the world ages, framework, Bede's eschatological vision and Bede's eschatological perspective. It will be of interest to those studying early medieval history, theology or literature as well as anyone with a particular interest in Bede and Anglo-Saxon England.
