The Palaeolithic Origins of Human Burial Paul Pettitt, 2010-12-20 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age The Palaeolithic Origins of Human Burial takes a novel approach to the long term development of human mortuary activity the various ways we deal with the dead and with dead bodies It is the first comprehensive survey of Palaeolithic mortuary activity in the English language Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify core areas of behaviour towards the dead that probably have very deep evolutionary antiquity From that point the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed The core chapters of the book survey the mortuary activities of early hominins archaic members of the genus *Homo* early *Homo sapiens* the Neanderthals the Early and Mid Upper Palaeolithic and the Late Upper Palaeolithic world Burial is a striking component of Palaeolithic mortuary activity although existing examples are odd and this probably does not reflect what modern societies believe burial to be and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene When did symbolic aspects of mortuary ritual evolve When did the dead themselves become symbols In discussing such questions The Palaeolithic Origins of Human Burial offers an engaging contribution to the debate on modern human origins It is illustrated throughout includes up to date examples from the Lower to Late Upper Palaeolithic including information hitherto unpublished **The Origins of Modern Humans** Fred H. How Compassion Made Us Human Penelope Spikins, 2015-05-07 An intriguing look at how our capacity to care about and connect with others has contributed to our evolutionary success as a species Our ability to care about the wellbeing of others whether they are close family or strangers can appear to be unimportant in today's competitive societies But in this volume archaeologist Penny Spikins argues that compassion lies at the heart of what makes us human She takes us on a journey from the earliest Stone Age societies two million years ago to the lives of Neanderthals in Ice Age Europe using archaeological evidence to illustrate the central role that emotional connections had in human evolution Simple acts of kindness left to us from millions of years ago provide evidence for how social emotions and morality evolved and how our capacity to reach out beyond ourselves into the lives of others allowed us to work together for a common good and form the basis for human success
