towards a growing degree of inter and multidisciplinary during the recent decades The concept of medieval studies covers in fact a multitude of disciplines some of them being loyal to their long established traditions whereas others are very new and borrow methods from other branches of the humanities or even from modern natural or social sciences Since this means not only new possibilities but also new challenges sources and methodology should obviously concern anyone engaged in the history and culture of the Middle Ages Regardless of what aspects of the medieval world a scholar is dealing with his or her study has much to gain from a source pluralistic approach in order to be able to understand and even combine different types of sources a scholar must be aware of what methods are relevant and available and how they can be adapted and applied

(Un)doing History Vanita Seth, 2025 Against the grain of much contemporary scholarship within medieval studies this work emphasizes the radical alterity and historical rupture that the Middle Ages represents in European history Through an engagement with three contentious debates in medieval studies historiography race and individuated subjectivity Vanita Seth's work employs postcolonial and postmodern theorizing to explore questions of ontology epistemology racial privileging and emotion and identity in the European Middle Ages and early modern period While the subject matter of this book is historical the stakes are contemporary and political Seth's contention is that it is the very

alterity that the medieval represents that enables contemporary scholars and activists to recognize as historical that which is so often posited as natural Writing a history of absence while also engaging radically different ways of being in the world this book argues helps to disrupt the self evident naturalization of the face to contest knee jerk celebrations of individuality tethered to the human visage and to recognize racism not as an age old nemesis but as a distinctly modern form of organizing power This work is interdisciplinary engaging scholarship in history history of art science studies philosophy feminist theory anthropology race studies and literature and presumes no prior specialized knowledge in medieval studies and or history Essential reading for scholars and students in the fields of medieval and early modern history race historiography identity and emotion studies

Whose Middle Ages? Andrew Albin, Mary C. Erler, Thomas O'Donnell, Nina Rowe, Nicholas L. Paul, 2019-10 Whose Middle Ages is an interdisciplinary collection of short accessible essays intended for the non specialist reader and ideal for teaching at an undergraduate level Each of twenty two essays takes up an area where humans have dug for meaning into the medieval past and brought something distorted back into the present in our popular entertainment in our news our politics and our propaganda and in subtler ways that inform how we think about our histories our countries and ourselves Each author teases out the stakes of a history that has refused to remain past and uses the tools of the academy to read and reread familiar stories objects symbols and myths By communicating consensus positions within the academy Whose Middle Ages gives non specialists access to the richness of our historical knowledge while debunking damaging misconceptions about the medieval past Myths about the medieval period are especially beloved among the globally resurgent far right from crusading emblems on the shields borne by alt right demonstrators to the on screen image of a lily white European populace defended from actors of color by internet trolls This collection attacks these myths directly by insisting on seeing the relics of the Middle Ages on their own terms Each essay uses its author's academic research as a point of entry and takes care to explain how the author knows what she or he knows and what kinds of tools bodies of evidence and theoretical lenses allow scholars to write with certainty about elements of the past to a level of detail that might seem unattainable By demystifying the methods of scholarly inquiry Whose Middle Ages serves as an antidote not only to the far right's errors of fact and interpretation but to its assault on scholarship and expertise as valid means for the acquisition of knowledge
