Shaping China's Future In World Affairs Robert G Sutter,2019-06-26 This book considers Chinese foreign policy and China's future role in world affairs in the context of the country's recent past Robert Sutter shows that although it appears to be in U.S. interests for post Mao leaders to continue moving toward international norms a post Deng leadership backed by growing economic and military power and reflecting profound changes in China's economy and society could move in markedly different directions Most foreign powers appear willing to accommodate China avoiding actions that could prompt a sharp shift in Chinese foreign policy but Sutter argues that current U.S. policy intrudes on so many issues that are particularly sensitive for Beijing and for China's future that it represents perhaps the most critical variable determining how China will position itself in world affairs Concluding that there is no guarantee the United States will use this influence wisely Sutter examines the uncertainty and unpredictability of U.S. foreign policy in the post Cold War environment that work against the creation of an effective U.S. policy toward China

Principles of an Epistemology of Values Marià Corbí,2015-10-12 This book addresses the need to create an axiological epistemology This term refers to knowledge of what is axiological i.e. everything related to human values and the know how on how to manage the study of values In knowledge societies we know and live axiological projects that we do not receive from anyone but that we must construct ourselves in a situation of continuous change In view of the fact that the axiological crisis in which we are immersed is the most serious one that humanity has suffered over its long history the seriousness and urgency of the issue in question is evident Adequate knowledge is required to solve this problem which is at the root of all the problems we are experiencing This work offers a potential solution that in contrast to the past cannot be definitive but must be transformed throughout the continuous changes to ways of life as a result of technoscience It will prove of great value to all those who must operate within human values and motivate groups as well as to those interested in spirituality
