

# SHAPING (PSYCHOLOGY)

## DEFINITION

Shaping is a technique that involves rewarding successive approximations to a target behavior.

When the person or animal exhibits a behavior that is similar to the target behavior, it is rewarded. This process is repeated as the behavior exhibited gets closer and closer to the target.

## EXAMPLE

**Teaching Children Positive Habits:** We use shaping when we teach a child habits like washing their hands or putting away toys. Generally, a parent will reward them with stickers for completing small tasks. Over time, they will learn instinctively to do the task without receiving the reward.

**Shaping Up: Art drawings, Essays, Poetry and Interpretations** Rinos Mwanaka, 2021-08-31 Shaping Up is more personal and intimate

than the author's previous works. The poems and images reflect a period while he was living outside of Zimbabwe in South Africa. The immigrant experience gives the work a more personal, closed, abstracted feel driven by loneliness of the exilic condition. Living in the element uninhibited and careless can help deal with confounding controversial issues more easily; this theme can be dissected from the drawings to do with sex, sexuality, and gender issues. The line breaks whirl; things out sometimes is bold, sometimes is barely there; thus the drawings straddle the tenuousness of time and life. Wake Up... Shape Up... Live the Life You Love Steve E.
