**Sharks: Conservation, Governance and Management** Erika J. Techera, Natalie Klein, 2014-06-05 The key aim of this book is to explore the global conservation and management of sharks There has been a rapid decline in populations of many shark species while new science has emerged of the critical role they play in marine ecosystems However the authors show that conservation law and policy have been slow to develop with only a small number of iconic species being protected worldwide The increase in fishing impact primarily through shark finning and by catch has led to shark conservation receiving greater international attention in recent years The book explores our current knowledge and status of the law and science in relation to sharks with a particular focus on improving frameworks for their conservation and management Recent trends are analysed including shark finning bans that have been put in place in several countries the widening number of nations establishing shark sanctuaries and the growth of shark based tourism The efficacy of current listing processes for endangered species and fisheries regulations is also examined Tourism is explored as an alternative to fishing and the risks and impacts associated with this industry are analysed Contributors include leading authorities from universities and conservation organizations in North America Europe and Australia A common theme is to emphasise the importance of collaborative governance between various interest groups and the need for inter disciplinary research and management approaches that are necessary to address the decline in sharks     **Great Adventures** Lonely

**Tourism Management** James E. S. Higham, Michael Lück, 2008 This book seeks to underscore the need for scientific approaches to first understanding and then managing tourist interactions with marine wildlife It draws upon the work of leading natural and social scientists whose work serves the interests of sustainable wildlife based marine tourism Thus from within the natural science disciplines of marine biology environmental science behavioural ecology conservation biology and wildlife management come chapters that provide insights into the effects of human disturbance on marine wildlife the impacts that tourists may have upon wild animals and the management approaches to mitigating impacts that may in the long term be biologically significant Equally from the social science disciplines of geography sociology management and social anthropology are drawn chapters that explore demand for marine wildlife experiences the benefits that visitors derive from their experiences ethical and legislative contexts and management issues that arise when tourists interact with populations of wild animals in coastal and marine environments Adventure Tourism Management Ralf

Buckley, 2011-01-03 The academic study of adventure tourism is rapidly increasing in popularity with research beginning to focus on it heavily This book is a cohesive and comprehensive look at this multi million dollar industry sector from a variety of perspectives relevant to the teaching of tourism Ideal for the undergraduate student taking adventure tourism as a single subject degree or as part of their tourism management studies this book documents analyses and offers insight into the latest

research in the area Includes analysis of products trends climate change risk management and environmental management and many others The Subsectors section within the book offers an overview of the twenty or more definable sectors within the adventure tourism industry considering their origins and history latest trends and demographic groups The author then goes on to look in more detail at Wildlife Tourism Marine Tourism Helitourism and Boardsports Each chapter will include seven pedagogical elements introduction what the chapter does and doesn't cover plain language review of the chapter topic with minimal referencing essentially like lecture notes concluding paragraph to the review section explaining how it leads to the next chapter's review of recent research condensed into tables where possible revision notes a few pages of bullet points summarising the review and research a sample set of assignment questions three to six per chapter in some cases readings on relevant topics condensed from previous publications

*Deadly Beautiful* Liana Joy Christensen, 2011 Did you know that the humble marmot is responsible for more than one billion human deaths Or that it's possible to be bitten by a snake's head for up to an hour after it's been decapitated On the flip side for every person bitten by a shark each year 25 people are bitten by New Yorkers It seems that truth sometimes is stranger than fiction These facts and many more appear in this fascinating tribute to our world's deadly wildlife At its heart however *Deadly Beautiful* makes a passionate plea for us to learn to better cohabit with our fellow residents of planet Earth Ever increasing concern for the fate of the environment and the world's endangered wildlife means that this book is a particularly timely addition to the world of natural history publishing Dr Liana Joy Christensen one of Australia's foremost nature writers takes a fresh and entertaining look at the deadly animals with which humans have for so long enjoyed a love hate relationship These animals are generally not the aggressors nor the lethal killing machines that mythology and tradition would have us believe Most also serve vital roles in maintaining the ecological balance of their habitats while their fascinating behaviour and often striking beauty make them worthy of close study particularly as so many of them are facing the worst death of all extinction Beautifully illustrated *Deadly Beautiful* is certain to foster a new understanding and appreciation of these incredible animals and their importance on a global scale
