Sharks of the Shallows Jeffrey C. Carrier, 2017-08-31 Thrilling underwater photographs enrich this unique guide to the shallow water sharks of Florida and the Bahamas Agile sleek and precise sharks display many qualities we can admire and appreciate These marvels of evolution have adapted to thrive in every major aquatic realm on the planet from frigid Arctic waters through temperate but stormy seas and on into the tropics However few places on Earth are home to the amazing diversity of shark species that beautify the shallow waters of Florida and the Bahamas In this first ever book dedicated to the sharks of this region biologist Jeffrey C

Carrier reveals the captivating lives of these large marine predators and describes how they have survived for over 400 million years Guiding readers through basic biology key attributes and identification tips the book explores what makes sharks such successful apex predators Carrier explains fascinating phenomena including the reason for the bizarre shape of the hammerhead how a bull shark is able to swim hundreds of miles up freshwater rivers what lies behind sharks remarkable capability to learn and remember and why many scientists believe that they are equipped with the most sophisticated sensory systems in the animal kingdom With the stunning full color underwater photography of Andy Murch Jillian Morris and Duncan Brake *Sharks of the Shallows* brings boaters fishers divers and shark lovers directly alongside these unfairly maligned creatures And not a moment too soon Sharks are experiencing stresses unlike any in their long history and are struggling to survive in a changing ocean They will continue to grace our coastlines only if we care enough to understand them

Biology of Sharks and Their Relatives Jeffrey C. Carrier, Colin A. Simpfendorfer, Michael R. Heithaus, Kara E. Yopak, 2022-06-08 *Biology of Sharks and Their Relatives* is an award winning and groundbreaking exploration of the fundamental elements of the taxonomy systematics physiology and ecology of sharks skates rays and chimera This edition presents current research as well as traditional models to provide future researchers with solid historical foundations in shark research as well as presenting current trends from which to develop new frontiers in their own work Traditional areas of study such as age and growth reproduction taxonomy and systematics sensory biology and ecology are updated with contemporary research that incorporates emerging techniques including molecular genetics exploratory techniques in artificial insemination and the rapidly expanding fields of satellite tracking remote sensing accelerometry and imaging With two new editors and 90 contributors from the US UK South Africa Portugal France Canada New Zealand Australia India Palau United Arab Emirates Micronesia Sweden Argentina Indonesia Cameroon and the Netherlands this third edition is the most global and comprehensive yet It adds six new chapters representing extensive studies of health stress disease and pathology and social structure and continues to explore elasmobranch ecological roles and interactions with their habitats The book concludes with a comprehensive review of conservation policies management and strategies as well as consideration of the potential effects of impending climate change Presenting cohesive and integrated coverage of key topics and discussing technological advances used in modern shark research this revised edition offers a well rounded picture for students and researchers

The whale shark, *rhiniodon typus* Smith, 1828 Fay Henry Wolfson, 1981 *Sharks: Conservation, Governance and Management* Erika J. Techera, Natalie Klein, 2014-06-05 The key aim of this book is to explore the global conservation and management of sharks There has been a rapid decline in populations of many shark species while new science has emerged of the critical role they play in marine ecosystems However the authors show that conservation law and policy have been slow to develop with only a small number of iconic species being protected worldwide The increase in fishing impact primarily through shark finning and by catch has led to shark conservation receiving greater international

attention in recent years The book explores our current knowledge and status of the law and science in relation to sharks with a particular focus on improving frameworks for their conservation and management Recent trends are analysed including shark finning bans that have been put in place in several countries the widening number of nations establishing shark sanctuaries and the growth of shark based tourism The efficacy of current listing processes for endangered species and fisheries regulations is also examined Tourism is explored as an alternative to fishing and the risks and impacts associated with this industry are analysed Contributors include leading authorities from universities and conservation organizations in North America Europe and Australia A common theme is to emphasise the importance of collaborative governance between various interest groups and the need for inter disciplinary research and management approaches that are necessary to address the decline in sharks
